Optical Information Technologies

Three-Dimensional Refractive Images for Laser Measurements Techniques <i>M. V. Yesin, I. L. Raskovskaya, B. S. Rinkevichyus, and A. V. Tolkachev</i>	219
Polychromatic Hilbert Diagnostics of the Evolution of Vortex Rings Induced by a Pressure Jump on a Hole <i>Yu. N. Dubnishchev, N. A. Dvornikov, V. G. Nechaev, and O. N. Novoselova</i>	227
Application of Modern Optical Methods for Detecting the Spatial Structure of Turbulent Flames <i>V. M. Dulin, D. M. Markovich, M. P. Tokarev, and L. M. Chikishev</i>	235
Quasi-Optimal Processing of Laser Doppler Vibrometer Signals <i>V. A. Grechikhin</i>	244
Stimulated Low-Frequency Raman Scattering in Nanostructures <i>N. V. Tcherniega, A. D. Kudryavtseva, M. I. Samoylovich, A. S. Shevchuk, and S. M. Kleshcheva</i>	250
Boundary Effects of Light Scattering in Laser Diagnostics of Two-Phase Flows <i>N. V. Semidetnov</i>	255
Wave Methods for Modeling Refractograms for Diagnostics of Gradients of Phase Inhomogeneity <i>I. L. Raskovskaya</i>	262
Hilbert Diagnostics of Rayleigh–Benard Convection in Fluids <i>V. A. Arbuzov, E. V. Arbuzov, N. S. Bufetov, E. O. Shlapakova</i>	268
Turbidimetric Method for Measuring the Parameters of Submicron Aerosols <i>S. S. Titov, A. A. Pavlenko, A. B. Kudryashov, V. A. Arkhipov, and S. S. Bondarchuk</i>	274
Investigation of Droplet Size Distribution in Two-Phase Flows Using a Combined Method for Recording Droplet Fluorescence and Diffraction Scattering of Light <i>A. G. Golubev, A. A. Sviridenkov, and V. I. Yagodkin</i>	281
Correlation Analysis of Digital Images of Flows with Subpixel Accuracy <i>N. A. Fomin and O. V. Meleeva</i>	287
Experimental and Numerical Study of Nonstationary Buoyant Jets <i>P. V. Antonov, V. A. Arbuzov, V. S. Berdnikov, V. A. Grishkov, O. N. Novoselova, and V. V. Tikhonenko</i>	293
Study of Shock-wave Flows in the Channel by Schlieren and Background Oriented Schlieren Methods <i>F. N. Glazyrin, I. A. Znamenskaya, I. V. Mursenkova, N. N. Sysoev, and J. Jin</i>	303
Thermal Imaging Studies of the Laminar-Turbulent Transition in the Rayleigh–Benard Convection <i>V. S. Berdnikov, V. A. Grishkov, K. Yu. Kovalevskii, and V. A. Markov</i>	311
Simultaneous Measurements of the Distance and Velocity of Diffusely Scattering Objects by Active Laser Interferometry with Linear Frequency Modulation <i>V. S. Sobolev, G. A. Kashcheeva, F. A. Zhuravel', and A. M. Kharin</i>	319
