Nanotechnologies in Optics and Electronics

Precise Measurements of Nanostructure Parameters <i>L. I. Fedina, D. V. Sheglov, A. K. Gutakovskii, S. S. Kosolobov, and A. V. Latyshev</i>	301
Nano- and Micrometrology at PTB: State of the Art and Future Challenges <i>H. Bosse, L. Koenders, F. Härtig, E. Buhr, and G. Wilkening</i>	312
Three-Dimensional Nanopositioning and Nanomeasuring Machine with a Resolution of 0.1 nm <i>G. Jäger</i>	318
Medical and Biological Measurement with Micro- and Nanosensors <i>P. Rolfe</i>	324
Testing Aspheric Lenses: New Approaches <i>W. Osten, B. Dörband, E. Garbusi, C. Pruss, and L. Seifert</i>	329
Analysis of the Contact Probe Mechanism for Micro-Coordinate Measuring Machines <i>K.-Ch. Fan, F. Cheng, W.-T. Pan, and R. Li</i>	340
Development of a Micro-Miniature Nanoindentation Instrument with a Force Resolution of 1 nN <i>S. Gao, Zh. Li, and K. Herrmann</i>	347

Optical Information Technologies

Comparison of Temperature Distribution Measurement Methods with the Use of the Bragg Gratings and Raman Scattering of Light in Optical Fibers <i>S. A. Babin, A. G. Kuznetsov, and I. S. Shelemba</i>	353
Automatic Recording of Object Motion by the Speckle Method in the Terahertz Range <i>B. A. Knyazev, A. A. Nikitin, and V. S. Cherkasskii</i>	360
Diffractive Elements for a Free Electron Laser <i>V. M. Vedernikov, P. M. Dutov, A. I. Kokarev, V. P. Kir'yanov, B. A. Knyazev, V. G. Nikitin, I. G. Pal'chikova, A. R. Sametov, M. F. Stupak, Y. V. Chugui, and V. V. Chukanov</i>	365
Estimates of the Maximum Likelihood of Parameters of Weak Optical Signals during Photodetecting by Means of Recording Photoelectron Emission Moments <i>V. S. Sobolev and S. V. Khabarov</i>	376

Calculation and Information-Measurement Systems

Studying Thin Films Obtained Through Centrifugation of the Human Blood Serum by Methods of Spectral Ellipsometry and Infrared Spectroscopy <i>M. I. Voevoda, S. E. Pel'tek, M. V. Kruchinina, S. A. Kurilovich, V. N. Kruchinin, K. P. Mogil'nikov, and S. V. Rykhlytskii</i>	382
Multichannel High-Performance Optoelectronic Control of the Surface of Fuel Pellets <i>A. V. Beloborodov, E. V. Vlasov, P. S. Zav'yalov, and L. V. Finogenov</i>	394
