## Automation Systems in Scientific Research and Industry

Multi-Objective Control of Distributed Parameter Systems in the Case of Interval Uncertainty of the Plant Characteristics <i>E. Ya. Rapoport and Yu. E. Pleshivtseva</i>	317
Analytical Synthesis of the State Observer of a Bilinear Dynamic System with Vector Input <i>A. Z. Asanov and D. N. Dem'yanov</i>	331
Applying a Relay Feedback Test for Autotuning the Electrohydraulic Controller of a Strength Testbed <i>V. D. Yurkevich, P. A. Sunyaikina, and S. V. Syrenov</i>	339
Control of Hybrid Unmanned Aerial Vehicle Motion in Transitional Modes <i>S. A. Belokon, D. S. Derishev, Yu. N. Zolotukhin, A. A. Nesterov, and M. N. Filippov</i>	346
Simulation of Hybrid Unmanned Aerial Vehicle Motion <i>S. A. Belokon, D. S. Derishev, Yu. N. Zolotukhin, and A. P. Yan</i>	356
PID Controller Design for a Second-Order Nonlinear Plant <i>G. A. Frantsuzova and A. S. Vostrikov</i>	364
Construction of Potential Fields for the Local Navigation of Mobile Robots <i>A. B. Filimonov, N. B. Filimonov, and A. A. Barashkov</i>	371
Fuzzy Optimization in Discrete-Continuous Control Systems for Multiple-Operation Technological Processes <i>V. N. Mitroshin, G. N. Rogachev, B. K. Chostkovskii, and N. G. Rogachev</i>	376
Modeling of Underground Coal Mining Processes <i>V. V. Okolnishnikov, A. A. Ordin, and S. V. Rudometov</i>	383
Influence of Disturbing Factors in a System for Measuring Radial Clearances in Gas-Turbine Engines with Temperature Self-Compensation <i>S. Yu. Borovik, P. E. Podlipnov, Yu. N. Sekisov, and O. P. Skobelev</i>	388

---

## Analysis and Synthesis of Signals and Images

Multi-Stage Algorithms of Localization of a Random Pulsed Source with a Two-Step Probability Density Function in the Search Interval <i>A. L. Reznik, A. A. Soloviev, and A. V. Torgov</i>	399
Comparative Efficiency of Methods of Cooperative Processing of Imagery Information <i>S. M. Ogreb and P. M. Yukhno</i>	406
Analyzing the Efficiency of Segment Boundary Detection Using Neural Networks <i>A. V. Kugaevskikh and A. A. Sogreshilin</i>	414
