### Physical and Engineering Fundamentals of Microelectronics and Optoelectronics

- Development of Methods and Instruments for Optical Ellipsometry  
at the Institute of Semiconductor Physics of the Siberian Branch  
of the Russian Academy of Sciences  
*E. V. Spesivtsev, S. V. Rykhliitskii, and V. A. Shvets* 419
- Growing of HgCdTe Heterostructures with in situ Ellipsometric Control  
*V. A. Shvets, N. N. Mikhailov, and S. A. Dvoretiskii* 426
- Emitters Based on Semiconductor Bragg Microcavities  
*V. A. Haisler, I. A. Derebezov, A. I. Toropov, and I. I. Ryabtsev* 436
- Effect of Electron Trapping Centers on Electrical and Photoelectric  
Properties of PbSnTe:In  
*A. E. Klimov and V. N. Shumsky* 442
- Formation of Type-II InAs/GaSb Strained Short-Period Superlattices  
for IR Photodetectors by Molecular Beam Epitaxy  
*E. A. Emel'yanov, D. F. Feklin, A. V. Vasev, M. A. Putyato,  
B. R. Semyagin, A. P. Vasilenko, O. P. Pchelyakov, and V. V. Preobrazhenskii* 452
- Oxidation Kinetics of a Silicon Surface in a Plasma of Oxygen with Inert Gases  
*A. Kh. Antonenko, V. A. Volodin, M. D. Efremov,  
P. S. Zazulya, G. N. Kamaev, and D. V. Marin* 459
- Optical Properties and Morphology of Diamond-Like Films Obtained  
in a Supersonic Flow of a Hydrocarbon Plasma  
*S. N. Svitashева, G. A. Pozdnyakov, D. V. Sheglov,  
and Yu. V. Nastaushchev* 465
- Ellipsometric Monitoring in Label-Free Microarray Biotechnologies  
*V. V. Vlasov, A. N. Sinyakov, D. V. Pyshnyi, S. V. Rykhliitskii,  
V. N. Kruchinin, E. V. Spesivtsev, I. A. Pyshnaya, E. V. Kostina,  
E. D. Dmitrienko, and V. P. Bessmel'tsev* 472
- Estimation of the Ultimate Efficiency of a Three-Pin Solar Cell Based  
on the GaAs/Si Heterostructure  
*D. O. Kuznetsov, E. G. Tishkovskii, and D. M. Legan* 482
- Dependences of the Optical Characteristics of  $Al_xGa_{1-x}N$  Films on the Substrate  
Composition and Polarity  
*S. N. Svitashева and K. S. Zhuravlev* 485
- Modeling the Formation of Silicon Nanoclusters during Annealing  $SiO_x$  layers  
*E. A. Mikhant'ev, I. G. Neizvestnyi, S. V. Usenkov,  
and N. L. Shvarts* 490
- 

### Automatic Control Systems in Scientific Research and Industry

- Infrared Scanning Microscope with High Spatial Resolution  
*V. M. Bazovkin, I. V. Mzhel'skii, G. L. Kuryshev, and V. G. Polovinkin* 498
- Calibration of Photodetectors in IR Microscopes  
*G. L. Kuryshev, I. V. Mzhel'skii, A. E. Nastov'yak, and V. G. Polovinkin* 503

Application of Uncooled Microbolometer Detector Arrays for Recording Radiation of the Terahertz Spectral Range	
<i>M. A. Dem'yanenko, D. G. Esaeu, I. V. Marchishin, V. N. Ovsyuk, B. I. Fomin, B. A. Knyazev, and V. V. Gerasimov</i>	508
Application of Ellipsometry for Studying Bio-Organic Media	
<i>M. I. Voevoda, S. E. Pel'tek, M. V. Kruchinina, S. A. Kurilovich, V. N. Kruchinin, S. V. Rykhlytskii, and K. P. Mogil'nikov</i>	513
Automated System for Measuring Electrical and Recombination-Diffusion Parameters of Charge Carriers in <i>p</i> -Type Mercury-Cadmium-Tellurium Films	
<i>B. Ya. Kostyuchenko, D. V. Kombarov, and D. Yu. Protasov</i>	519
