Contents

Vol. 52, No. 5, 2016

A simultaneous English language translation of this journal is available from Allerton Press, Inc.,
Distributed worldwide by Springer. *Optoelectronics, Instrumentation and Data Processing* ISSN 8756-6990.

Physical and Engineering Fundamentals of Microelectronics and Optoelectronics

Germanium-Based Metal-Insulator-Semiconductor Transistors as a Direction for the Further Development of CMOS Technology
I. G. Neizvestny 421

Materials Science Aspects of Dielectric Film Compositions in the Planar Technology of Ge-Based MIS Structures
E. B. Gorokhov and K. N. Astankova 428

Optimization of the Response of Nanowire Biosensors
O. V. Naumova and B. I. Fomin 434

Current-Voltage Characteristics of PbSnTe:In Films in a Magnetic Field with Electron Injection from the Contacts
D. V. Ishchenko and V. S. Epov 438

Negative Differential Resistance in High-Power InGaN/GaN Laser Diode
V. T. Shamirzaev, V. A. Gaisler, and T. S. Shamirzaev 442

Optical Information Technologies

Three-Spectrum Multielement Photodetector Device
I. G. Neizvestny and V. N. Shumsky 447

Quantum Key Distribution in Single-Photon Communication System
D. B. Tretyakov, A. V. Kolyako, A. S. Pleshkov, V. M. Entin, I. I. Ryabtsev, I. G. Neizvestny 453

Radiation Detectors Based on the PbSnTe:In Films, Sensitive in the Terahertz Range of the Spectrum
I. G. Neizvestnyi, A. E. Klimov, V. V. Kubarev, V. N. Shumskii 462

Study of Photon Statistics Using a Compound Poisson Distribution and Quadrature Measurements
Yu. I. Bogdanov, N. A. Bogdanova, K. G. Katamadze, G. V. Avosopyants, and V. F. Lukichev 475

Nanotechnologies in Optics and Electronics

Formation of Silicon Nanocrystals in Si—SiO_2—α-Si—SiO_2 Heterostructures during High-Temperature Annealing: Experiment and Simulation
I. G. Neizvestny, V. A. Volodin, G. N. Kamaev, S. G. Cherkova, S. V. Usenkov, and N. L. Shwartz 486

Raman Studies of Phase and Atomic Compositions of GeSi Nanosystems after Pulsed Annealing

A. V. Dvurechenskii, V. A. Volodin, G. K. Krivyakin, A. A. Shklyaev, S. A. Kochubei, I. G. Neizvestny, and J. Stuchlik 496

Adatom Concentration Distribution on an Extrawide Si(111) Terrace during Sublimation

D. I. Rogilo, N. E. Rybin, L. I. Fedina, and A. V. Latyshev 501

Monte Carlo Simulation of the Formation of $A^{III}B^{V}$ Nanostructures with the Use of Droplet Epitaxy

M. A. Vasilenko, A. G. Nastovjak, I. G. Neizvestny, and N. L. Shwartz 508

Introscopy in Nano- and Mesoscopic Physics: Single Electronics and Quantum Ballistics

V. A. Tkachenko, O. A. Tkachenko, Z. D. Kvon, A. V. Latyshev, and A. L. Aseev 518
