Modeling in Physical and Technical Research

- Error Analysis of Indirect Broadband Monitoring of Multilayer Optical Coatings
using Computer Simulations
Z. V. Semenov and V. A. Labusov 537
- Modeling of the Formation of Steep Portions of a Piecewise Continuous Profile
in a Single-Step Technology for Fabricating Diffractive Optical Elements
using Oblique Laser Beams
V. P. Kir'yanov and V. G. Nikitin 548
- Determination of Zeeman Shifts of Spectral Structures in a Nonuniform Magnetic Field
V. A. Sorokin 554
- Three-Axis Micro-Opto-Electro-Mechanical Angular Velocity Transducer Based on
the Optical Tunneling Effect
V. I. Busurin, A. T. Fam, M. A. Zheglov, and V. M. Medvedev 562
-

Analysis and Synthesis of Signals and Images

- Estimation of the Alignment Parameters of a Scanning Device
with a Multirow Focal Plane Array
G. I. Gromilin, V. P. Kosykh, K. V. Kozlov, and V. N. Vasil'ev 570
- Object Classification Based on Analysis of Spectral Characteristics of Seismic
Signal Envelopes
Yu. V. Morozov and A. A. Spektor 576
- Efficiency of Bilateral Filter Application in Problems of Optical Flow Calculation
V. V. Titkov, S. V. Panin, P. S. Lyubutin, and V. O. Chemezov 583
- Frequency Analysis of Recurrence Variational P-Splines
E. A. Kochegurova, A. I. Kochegurov, and N. E. Rozhkova 591
-

Computational and Data Acquisition Systems

- Simultaneous Localization and Mapping System on the Basis of a CoreSLAM Approach
D. A. Baramiya, M. S. D'yakov, S. A. Kuzikovskii, and M. M. Lavrentyev 599
- Quasioptimal Method for Solving the Triangulation Problem in Prior Uncertainty
Yu. G. Bulychev and E. N. Chepel' 604
-
