Distributed worldwide by Springer. *Physics of Wave Phenomena* ISSN 1541-308X.

Optical Spectroscopy

- Adiabatic Compressibility of the 4-Methylpyridin–Water Solution as a Function of the Temperature, Concentration, and Sound Frequency
D. I. Semenov 155
- Dispersion of the High-Frequency Sound Velocity in the Aqueous Solution of 4-Methylpyridine
L. M. Sabirov, D. I. Semenov, and Kh. S. Khaidarov 159
-

Optical Measurements

- First-Order Ether Drift Experiment with a Mach–Zehnder Fiber Interferometer
V. de Haan 164
-

Photonic Crystals

- Formation of Photonic Crystals Using Elastic Waves Amplified by the Double Frequency Electromagnetic Field
V. V. Krutov 167
-

Spectroscopy of Surface

- Structural Transformations on Cu(110) under Molecular Iodine Action
B. V. Andryushekin, V. V. Cherkez, V. M. Shevlyuga, and K. N. Eltsov 172
-

Gravitational Waves

- Gravitational Waves and Papapetrou Metric in the Six-Dimensional Treatment of Gravitation
I. A. Urusovskii 185
-

Wave Tomography

- Method for Measuring the Frequency Shifts of Interference Maxima in Monitoring of Dispersion Media: Theory, Implementation, and Prospects
V. M. Kuz'kin, G. A. Lyakhov, and S. A. Pereselkov 196
-

Hydroacoustics

- Effect of Intense Internal Waves on the Sound Field Interference Structure
V. M. Kuz'kin and S. A. Pereselkov 223
-

Remote Sensing of Natural Media

- LIDAR Observation of the Bubble Trace in the Sea Surface Layer
A. F. Bunkin, V. K. Klinkov, V. A. Luk'yanenko, and S. M. Pershin 230
-
