Distributed worldwide by Springer. *Physics of Wave Phenomena* ISSN 1541-308X.

Nonlinear Optics

- Nonparaxial Vortex Vector Solitons in a Nonlinear Cubic Medium
V. A. Aleshkevich, A. S. Zhukarev, and N. G. Uvarov 239
- Efficient Second Harmonic Generation of a Diode Laser Using Ring Cavity
with a KNbO₃ Crystal
A. K. Chernyshov and E. A. Chernyshova 244
- Formation of Quasi-Regular Diffraction Patterns in the Nonlinear Photorefractive
Fabry–Perot Interferometer
A. S. Perin, V. M. Shandarov, and F. Chen 251
-

Optical Spectroscopy

- High-Resolution Four-Photon Intracavity Laser Spectroscopy with the External Phase
Conjugation Mirror
A. F. Bunkin, M. A. Davydov, A. Yu. Ivochkin, and S. M. Pershin 256
- Laser Ablation of Alloys: Selective Evaporation Model
S. M. Pershin, V. N. Lednev, and A. F. Bunkin 261
- Shapiro Effect in the Light Pulse Testing of Gravitational Theories
I. A. Urusovskii 275
-

Electromagnetic Waves in Superstructures

- Transmission of an Electromagnetic Wave through a Bianisotropic Metafilm
G. V. Belokopytov, A. V. Zhuravlev, and Yu. E. Terekhov 280
- The Possibility of Cyclotron Echo Generation in Graphene on a SiC Substrate
D. V. Zav'yalov, V. I. Konchenkov, and S. V. Kryuchkov 287
-

Microwave Electronics

- Interaction of Space-Charge Waves in an Electron Beam with Electromagnetic Waves
in a Longitudinal Magnetic Field
G. M. Krasnova 290
- Microwave Annealing of Defects in Ferroelectric Triglycine Sulfate
S. V. Danilova, G. I. Ovchinnikova, and Yu. A. Pirogov 301
-

Low-Frequency Spectroscopy of Liquids

- Study of the Effect of a Low-Frequency Magnetic Field on the Spin-Lattice Relaxation in Water
and in Aqueous Solutions
N. S. Vasilyev, D. V. Kashaev, and M. G. Baryshev 305
-

Nonlinear Hydrodynamics

Transformations of the Turbulent Viscosity Distribution under the Effect of the Internal Waves in the System of Stratified Currents <i>B. I. Samolyubov and I. N. Ivanova</i>	308
Nonlinear Waves in Self-Gravitating Compressible Fluid and Generalized Cole–Hopf Substitutions <i>V. M. Zhuravlev and D. A. Zinov'ev</i>	313
