Optical Methods of Condensed Matter Physics

- Study of the Submicron Heterogeneity of Aqueous Solutions of Hydrogen-Bond Acceptor Molecules by Laser Diagnostics Methods
N. F. Bunkin, G. A. Lyakhov, A. V. Shkirin, A. V. Kobelev, N. V. Penkov, S. V. Ugraitskaya, and E. E. Fesenko, Jr. 241
- Investigation of the Phase States of Aqueous Salt Solutions near a Polymer Membrane Surface
N. F. Bunkin, V. A. Kozlov, I. N. Aliev, I. I. Molchanov, S. A. Abdullaev, K. N. Belosludtsev, M. E. Astashev, and S. V. Gudkov 255
-

Optical Modulators

- Cylindrical Liquid-Crystal Modulator for Stereoscopic Video Systems
V. A. Ezhov, S. A. Studentsov, G. V. Simonenko, and P. I. Ivashkin 265
-

Surface Wave Acoustics

- Effect of Shear Components of the Acoustic Field in the Viscous Liquid on the Structure of the Stoneley Wave at the Interface between the Liquid and Elastic Half-Spaces
V. A. Gusev and P. A. Simonova 268
-

Acoustic Tomography

- Ultrasonic Tomography of Nonmixing Fluid Flows
Yu. V. Pylnov, L. M. Krutyansky, Yu. I. Kutlubayeva, F. Zoueshtiagh, P. Chainais, V. Herman, and P. Pernod 273
-

Remote Sensing of Natural Media

- Interference and Phase Structure of the Low-Frequency Vector-Scalar Field in Shallow Water for Variable Reception or Transmission Depths
G. N. Kuznetsov and A. N. Stepanov 279
- Estimation of the Depth of a Stationary Sound Source in Shallow Water
T. N. Besedina, G. N. Kuznetsov, V. M. Kuz'kin, S. A. Pereselkov, and D. Yu. Prosovetskiy 292
-

Magnetic Resonance Imaging

Control of the Radiofrequency Field in Fluorine (^{19}F) Magnetic Resonance Imaging <i>N. V. Anisimov, M. V. Gulyaev, D. V. Volkov, O. S. Pavlova, and Yu. A. Pirogov</i>	304
Investigation of the Distribution of Heavy Nuclei in Laboratory Animals Using Multinuclear Magnetic Resonance Imaging <i>A. V. Kosenkov, M. V. Gulyaev, N. V. Anisimov, V. I. Lobyshev, and Yu. A. Pirogov</i>	311
