Vol. 24, No. 2, 2021

A Review of Methods for Studying the Elastic Characteristics of Nanoobjects <i>V. M. Fomin and A. A. Filippov</i>	117
Electron Energy Spectra of Elastically and Discretely Scattered Electrons of the Ti–6Al–4V Alloy Fracture Surface after Radial Shear Rolling at a Temperature of 1000°C <i>V. E. Panin, I. A. Shulepov, L. B. Botaeva, and N. A. Narkevich</i>	131
A Moment-Elasticity Thin Shell Model for Shear-Plus-Rotation Deformation <i>S. H. Sargsyan</i>	140
Out-of-Plane Tension of Thin Two-Layered Plates of Identically Oriented Hexagonal Crystals <i>V. A. Gorodtsov and D. S. Lisovenko</i>	146
Experimental and Numerical Investigation of the Catastrophic Stage of Failure on Different Scales from Rock Sample to Coal Mine <i>P. V. Makarov, I. Yu. Smolin, A. Yu. Peryshkin, A. S. Kulkov, and R. A. Bakeev</i>	155
A Numerical Study of the Contribution of Different Slip Systems to the Deformation Response of Polycrystalline Titanium <i>E. S. Emelianova, V. A. Romanova, R. R. Balokhonov, M. Pisarev, and O. S. Zinovieva</i>	166
Simple Modeling of Tensile Modulus for Toughened Ternary Nanocomposites <i>Y. Zare and K. Y. Rhee</i>	178
Multiscale Fracture of Ti–Al–N Coatings under Uniaxial Tension <i>A. R. Shugurov, A. V. Panin, A. I. Dmitriev, and A. Yu. Nikonov</i>	185
Design of Composites with a Specified Set of Physicomechanical Properties Using Three Control Parameters <i>S. A. Bochkareva, N. Yu. Grishaeva, B. A. Lyukshin, I. L. Panov, and S. V. Panin</i>	196
Evolution of the Fine Structure and Properties of Rail Metal during Long-Term Operation <i>V. E. Panin, Yu. F. Ivanov, A. A. Yuriev, V. E. Gromov, S. V. Panin, V. E. Kormyshev, and Yu. A. Rubannikova</i>	202
Estimation of Tensile Modulus for Cross-Linked Polyethylene/Clay Shape Memory Nanocomposites <i>Y. Zare and K. Y. Rhee</i>	211
Mechanical and Electrical Properties of Multiwalled Carbon Nanotube Nanocomposites with Different Resin Matrices <i>S. Samankan, M. R. Ayatollahi, and S. Shadlou</i>	219
