Vol. 24, No. 3, 2021

Prediction of Crystallographic Texture Formation in Polycrystalline Samples under Severe Plastic Deformation Based on a Two-Level Statistical Elasto-Viscoplastic Model <i>K. V. Ostapovich, P. V. Trusov, and A. Yu. Yants</i>	225
Modeling of Elastoplastic Stress States in Crack Tip Regions <i>S. A. Sokolov and D. E. Tulin</i>	237
Quasi-3D Refined Theory for Functionally Graded Porous Plates: Vibration Analysis <i>A. M. Zenkour and M. H. Aljadani</i>	243
Strain Gradient Effects at the Crack Tip under Plane Strain and Plane Stress Conditions <i>V. N. Shlyannikov, A. V. Tumanov, and R. M. Khamidullin</i>	257
Stability Loss and Delamination of a Thermal Barrier Coating from the Substrate under Heat Loads <i>P. A. Lyukshin, B. A. Lyukshin, N. Yu. Matolygina, and S. V. Panin</i>	269
Modeling of Tensile Modulus for Recycled PET/Clay Nanocomposites <i>Y. Zare and K. Y. Rhee</i>	282
Comparing Energy-Based Criterion with Strain-Based Criterion for Predicting Brittle Fracture in V-Shaped Notches under Mixed-Mode I/II Loading Conditions <i>S. H. Sajjadi, A. R. Khorshidvand, M. Jabbari, and M. Javadi</i>	291
Effect of the Magnetic Field, Initial Stress, Rotation, and Nonhomogeneity on Stresses in Orthotropic Material <i>K. S. Al-Basyouni and S. R. Mahmoud</i>	303
Strength Analysis of Multidirectional Fiber-Reinforced Composite Laminates with Uncertainty in Macromechanical Properties <i>S. Li and Z. Y. Ma</i>	311
Nonlocal Elasticity Theory for the Mechanical Behavior of Protein Microtubules <i>E. Ghandourah</i>	319
Very High Cycle Fatigue Failure of Near β Titanium Alloy <i>E. V. Naydenkin, A. P. Soldatenkov, I. P. Mishin, V. A. Oborin, and A. A. Shanyavskiy</i>	326
The Effect of Hydrophilic and Hydrophobic Nanofillers on Moisture Uptake and Mechanical Properties Degradation of Nanocomposites under Hot and Wet Conditions <i>H. Bayati, H. Khoramishad, D. Kordzangeneh, and F. Berto</i>	335
