Vol. 23, No. 4, 2020

Structural Turbulence of Plastic Flow and Ductile Fracture in Low-Alloy Steel under Lattice Curvature Conditions <i>V. E. Panin, V. E. Egorushkin, P. V. Kuznetsov, N. K. Galchenko, A. R. Shugurov, I. V. Vlasov, and Ye. Ye. Deryugin</i>	279
Deposition of Cermet Coatings on the Basis of Ti, Ni, WC, and B ₄ C by Cold Gas Dynamic Spraying with Subsequent Laser Irradiation <i>V. M. Fomin, A. A. Golyshev, V. F. Kosarev, A. G. Malikov, A. M. Orishich, and A. A. Filippov</i>	291
Modeling of Crack Self-Healing Kinetics <i>M. N. Perelmuter</i>	301
Discrete-Continuous and Continuous-Moment Models of Graphene under In-Plane Deformation <i>S. H. Sargsyan</i>	309
Calculation of the Temperature Dependence of the Surface Energy of Metal Nanoclusters in a Wide Range of Their Radii <i>I. F. Golovnev and E. I. Golovneva</i>	316
Study on the Size Dependence of Calibration Parameters of the New Local Approach Model for Cleavage Fracture <i>A. R. Shen, P. C. Li, Z. S. Yu, G. A. Qian, F. Berto, and W. Wu</i>	324
A Simple Technique for Calculation of an Interphase Parameter and Interphase Modulus for Multilayered Interphase Region in Polymer Nanocomposites via Modeling of Young's Modulus <i>Y. Zare and K. Y. Rhee</i>	332
Plastic Flow in a Chernov–Luders Band in Ultrafine-Grained 08G2B Steel <i>V. M. Farber, A. N. Morozova, V. A. Khotinov, M. S. Karabanalov, and G. V. Schapov</i>	340
Hardening Mechanism in Low-Carbon Low-Alloy Steels with a Simultaneous Increase in Ductility and Fracture Toughness <i>P. V. Kuznetsov, V. E. Panin, and N. K. Galchenko</i>	347
Analysis of Photo-Thermo-Elastic Response in a Semiconductor Media due to Moving Heat Source <i>F. S. Alzahrani and I. A. Abbas</i>	354
An Analytical Solution for the Problem of Stresses in Magneto-Piezoelectric Thermoelastic Material under the Influence of Rotation <i>K. S. Al-Basyouni, B. Dakhel, E. Ghandourah, and Ali Algarni</i>	362
