## Special Issue in Memory of Professor Victor Panin

Editors: Vasilii M. Fomin and Sergey V. Panin

The Physical Mesomechanics of the Earthquake Source <i>G. G. Kocharyan and S. B. Kishkina</i>	343
Physical Mesomechanics Approach to Modeling the Earth's Subsurface <i>M. A. Guzev and V. V. Makarov</i>	357
Autosoliton View of the Seismic Process. Part 1. Possibility of Generation and Propagation of Slow Deformation Autosoliton Disturbances in Geomedia <i>P. V. Makarov and Yu. A. Khon</i>	363
Autosoliton View of the Seismic Process. Part 2. Possibility of Generation and Propagation of Slow Deformation Autosoliton Disturbances in Geomedia <i>P. V. Makarov, I. Yu. Smolin, Yu. A. Khon, M. O. Eremin, R. A. Bakeev, A. Yu. Peryshkin, V. A. Zimina, A. Chirkov, A. A. Kazakbaeva, and A. Zh. Akhmetov</i>	375
Multilevel Models in Physical Mesomechanics of Metals and Alloys: Results and Prospects <i>P. V. Trusov, A. I. Shveykin, N. S. Kondratyev, and A. Yu. Yants</i>	391
Dislocation and Grain Size Roles in Physical Mesomechanics <i>R. W. Armstrong</i>	418
Influence of Surface Energy Inhomogeneity on Contact Adhesion: Simulation and Experiment <i>I. A. Lyashenko and V. L. Popov</i>	426
Stress State of Elastic Bodies with an Intermediate Layer in Rolling Contact with Slip <i>A. R. Meshcheryakova and I. G. Goryacheva</i>	441
Nonlinear Hypersonic Aerodynamics in Terms of Invariant Integrals: Some Exact Self-Similar Solutions for Jets and Projectiles <i>G. P. Cherepanov</i>	451
Dimensional Analysis of Critical Phenomena: Self-Weight Failure, Turbulence, Resonance, Fracture <i>Alberto Carpinteri and Federico Accornero</i>	459
Elastic Properties of Chiral Metallic Nanotubes Formed from Cubic Crystals <i>I. A. Bryukhanov, M. A. Volkov, V. A. Gorodtsov, and D. S. Lisovenko</i>	464
Fracture Stages and Residual Strength of Pipe Steel after Long-Term Operation <i>L. R. Botvina, V. M. Kushnarenko, M. R. Tyutin, V. P. Levin, A. E. Morozov, and A. I. Bolotnikov</i>	475
Synthesis and Characterization of Hot Extruded Magnesium-Zinc Nano-Composites Containing Low Content of Graphene Oxide for Implant Applications <i>A. Saberi, H. R. Bakhsheshi-Rad, E. Karamian, M. Kasiri-Asgarani, H. Ghomi, M. Omid, S. Abazari, A. F. Ismail, S. Sharif, and F. Berto</i>	486
