

Contents

Volume 288, 2015

On the Volume of a Hyperbolic Octahedron with $\bar{3}$ -Symmetry <i>N. V. Abrosimov, E. S. Kudina, and A. D. Mednykh</i>	1
Toric Origami Structures on Quasitoric Manifolds <i>Anton A. Ayzenberg, Mikiya Masuda, Seonjeong Park, and Haozhi Zeng</i>	10
Three-Dimensional Manifolds with Poor Spines <i>A. Yu. Vesnin, V. G. Turaev, and E. A. Fominykh</i>	29
Geometry of Lifts of Tilings of Euclidean Spaces <i>A. A. Gavriljuk</i>	39
Embedded Flexible Spherical Cross-Polytopes with Nonconstant Volumes <i>Alexander A. Gaifullin</i>	56
Parallelohedra Defined by Quadratic Forms <i>V. P. Grishukhin</i>	81
Improvements of the Frankl–Rödl Theorem on the Number of Edges of a Hypergraph with Forbidden Intersections, and Their Consequences in the Problem of Finding the Chromatic Number of a Space with Forbidden Equilateral Triangle <i>A. E. Zvonarev and A. M. Raigorodskii</i>	94
Local Approach and the Theory of Lovozerite Structures <i>S. V. Krivovichev</i>	105
Extremal Problems of Circle Packings on a Sphere and Irreducible Contact Graphs <i>O. R. Musin and A. S. Tarasov</i>	117
Cyclopermutohedron <i>Gaiane Yu. Panina</i>	132
On a Higher Dimensional Generalization of Seifert Fibrations <i>I. A. Taimanov</i>	145
On Flexible Polyhedral Surfaces <i>M. I. Shtogrin</i>	153
Ergodic Properties of Visible Lattice Points <i>Michael Baake and Christian Huck</i>	165
A Survey on Tight Euclidean t -Designs and Tight Relative t -Designs in Certain Association Schemes <i>Eiichi Bannai, Etsuko Bannai, and Yan Zhu</i>	189
(n, m) -Fold Covers of Spheres <i>Imre Bárány, Ruy Fabila-Monroy, and Birgit Vogtenhuber</i>	203

Density Bounds for Outer Parallel Domains of Unit Ball Packings <i>Károly Bezdek and Zsolt Lángi</i>	209
Cube-like Incidence Complexes and Their Groups <i>Andrew C. Duke and Egon Schulte</i>	226
New Results on Torus Cube Packings and Tilings <i>Mathieu Dutour Sikirić and Yoshiaki Itoh</i>	243
Inductive Rotation Tilings <i>Dirk Frettlöh and Kurt Hofstetter</i>	247
Delaunay Sets and Condensed Matter: The Dialogue Continues <i>Marjorie Senechal</i>	259
Correction to the paper “Homogenization and Dispersion Effects in the Problem of Propagation of Waves Generated by a Localized Source” (Proc. Steklov Inst. Math. 281 , 161–178 (2013)) <i>V. V. Grushin, S. Yu. Dobrokhotov, and S. A. Sergeev</i>	265
