Generalized Non-commutative Degeneration Conjecture <i>Alexander I. Efimov</i>	1
On the Kuznetsov–Polishchuk Conjecture <i>A. V. Fonarev</i>	11
Tangent Space to Milnor K -Groups of Rings <i>S. O. Gorchinskiy and D. V. Osipov</i>	26
Cartier Isomorphism for Unital Associative Algebras <i>D. B. Kaledin</i>	35
On Incomplete Gaussian Sums <i>M. A. Korolev</i>	52
On Translating Context-Free Grammars into Lambek Grammars <i>S. L. Kuznetsov</i>	63
Geometric Realizations of Quiver Algebras <i>Dmitri O. Orlov</i>	70
Number of Components of the Nullcone <i>V. L. Popov</i>	84
Laurent Phenomenon for Landau–Ginzburg Models of Complete Intersections in Grassmannians <i>Victor V. Przyjalkowski and Constantin A. Shramov</i>	91
Decomposable Branching Processes with a Fixed Extinction Moment <i>V. A. Vatutin and E. E. Dyakonova</i>	103
Manifolds of Solutions for Hirzebruch Functional Equations <i>V. M. Buchstaber and E. Yu. Bunkova</i>	125
Lorentz Invariant Vacuum Solutions in General Relativity <i>M. O. Katanaev</i>	138
Demonstration Representation and Tensor Products of Clifford Algebras <i>N. G. Marchuk</i>	143
Transverse Fundamental Group and Projected Embeddings <i>Sergey A. Melikhov</i>	155
On the Complexity of Constructing Multiprocessor Little-Preemptive Schedules <i>E. V. Shchepin</i>	166

Semisimple Lie Algebras and Hamiltonian Theory of Finite-Dimensional Lax Equations with Spectral Parameter on a Riemann Surface <i>O. K. Sheinman</i>	178
On the Set of Joint Representatives of Two Congruence Classes <i>Yu. N. Shteinikov</i>	189
Rational Homology of the Order Complex of Zero Sets of Homogeneous Quadratic Polynomial Systems in $\mathbb{R}^3$ <i>V. A. Vassiliev</i>	197
Lévy Laplacians and Instantons <i>B. O. Volkov</i>	210
Adjoint Variables and Intertemporal Prices in Infinite-Horizon Optimal Control Problems <i>S. M. Aseev</i>	223
Capacity of a Compact Set in a Logarithmic Potential Field <i>V. I. Buslaev</i>	238
On Equilibrium Problems Related to the Distribution of Zeros of the Hermite–Padé Polynomials <i>V. I. Buslaev and S. P. Suetin</i>	256
On the $\bar{\partial}$ -Problem with L^2 -Estimates on a Riemann Surface <i>E. M. Chirka</i>	264
Additive and Multiplicative Anisotropic Estimates for Integral Norms of Differentiable Functions on Irregular Domains <i>A. Yu. Golovko</i>	277
On Sum Sets of Sets Having Small Product Set <i>S. V. Konyagin and I. D. Shkredov</i>	288
Chain Development <i>Yu. V. Malykhin and E. V. Shchepin</i>	300
Integrability of the Sum of Absolute Values of Blocks of the Fourier–Walsh Series for Functions of Bounded Variation <i>Yu. V. Malykhin, S. A. Telyakovskii, and N. N. Kholshchevnikova</i>	306
Rigorous Results of Phase Transition Theory in Lattice Boson Models <i>D. P. Sankovich</i>	318
