Volume 291, 2015

L.S. Pontryagin's Studies on Optimal Processes and Differential Games <i>D. V. Anosov</i>	1
Stability Theorem and Extremum Conditions for Abnormal Problems <i>E. R. Avakov</i>	4
Caristi's Condition and Existence of a Minimum of a Lower Bounded Function in a Metric Space. Applications to the Theory of Coincidence Points <i>A. V. Arutyunov</i>	24
On the Boundedness of Optimal Controls in Infinite-Horizon Problems <i>S. M. Aseev</i>	38
Problem of Optimal Endogenous Growth with Exhaustible Resources and Possibility of a Technological Jump <i>K. O. Besov</i>	49
Dual Formulation of the Pontryagin Maximum Principle in Optimal Control <i>R. V. Gamkrelidze</i>	61
On a Class of Control Problems with Incomplete Information <i>N. L. Grigorenko and A. E. Rumyantsev</i>	68
On the Uniqueness of a Positive Stationary State in the Dynamics of a Population with Asymmetric Competition <i>A. A. Davydov and Amer Fadhel Nassar</i>	78
Fractal Theory of Saturn's Ring <i>M. I. Zelikin</i>	87
Approximate Solution to a Time Optimal Boundary Control Problem for the Wave Equation <i>D. A. Ivanov and M. M. Potapov</i>	102
Application of Optimal Control to a Biomechanics Model <i>Andrey A. Krasovskii</i>	118
Proportional Economic Growth under Conditions of Limited Natural Resources <i>A. V. Kryazhimskiy, A. M. Tarasyev, A. A. Usova, and Wei Wang</i>	127
On an Optimal Flow in a Class of Nilpotent Convex Problems <i>L. V. Lokutsievskiy</i>	146
Stability of the Zero Solution of a Relay System of Ordinary Differential Equations with Two Relays <i>A. A. Losev</i>	170

Differential Games for Neutral-Type Systems: An Approximation Model <i>N. Yu. Lukoyanov and A. R. Plaksin</i>	190
The Pontryagin Maximum Principle. Ab ovo usque ad mala <i>G. G. Magaril-Il'yaev</i>	203
Calculation of the Derivative of an Inaccurately Defined Function by Means of Feedback Laws <i>V. I. Maksimov</i>	219
On Some Properties of Nash Equilibrium Points in Two-Person Games <i>M. S. Nikol'skii</i>	232
Differential Inclusions with Unbounded Right-Hand Side and Necessary Optimality Conditions <i>E. S. Polovinkin</i>	237
On the Solution of Inverse Problems of Dynamics of Linearly Controlled Systems by the Negative Discrepancy Method <i>N. N. Subbotina, T. B. Tokmantsev, and E. A. Krupennikov</i>	253
On Solving Approach Problems for Control Systems <i>V. N. Ushakov, V. I. Ukhobotov, A. V. Ushakov, and G. V. Parshikov</i>	263
On an Asymptotic Analysis Problem Related to the Construction of an Attainability Domain <i>A. G. Chentsov and A. P. Baklanov</i>	279
