INTRODUCTION	1
--------------------	---

Part I. STATIONARY PROBLEMS

1. INTRODUCTION	8
Chapter 1. STATIONARY INEQUALITIES	13
2. Second-Order Semilinear Equations and Inequalities with Bounded Coefficients	13
3. Second-Order Semilinear Equations and Inequalities with Unbounded Coefficients	16
4. Higher Order Semilinear Equations and Inequalities with Bounded Coefficients	19
5. Higher Order Semilinear Equations and Inequalities with Unbounded Coefficients	21
6. Second-Order Elliptic Problems with Local (Complete) Blow-up of a Solution	24
7. Higher Order Semilinear Inequalities with Singular Coefficients	30
8. Second-Order Semilinear Differential Inequalities with Critical Degeneracy	33
9. Semilinear Differential Inequalities Associated with the Polyharmonic Operator	35
10. Nonexistence of Solutions to Semilinear Problems in a Half-Space	36
11. Semilinear Inequalities in Cones	39
12. A Quasilinear Model Problem and Its Generalizations	50
13. A General Case of Quasilinear Inequalities	56
14. Coercive Problems	58
15. Problems with the Right-Hand Side Depending on the Gradient of a Solution	61
16. Generalizations of the Bernstein Theorem	63
Chapter 2. SYSTEMS OF STATIONARY INEQUALITIES	70
17. Systems of Second-Order Semilinear Equations and Inequalities with Bounded Coefficients	70
18. Systems of Second-Order Semilinear Equations and Inequalities with Unbounded Coefficients ...	72
19. Systems of Higher Order Semilinear Equations and Inequalities with Bounded Coefficients	75
20. Systems of Higher Order Semilinear Equations and Inequalities with Unbounded Coefficients ...	77
21. Systems of Semilinear Inequalities in Cones	80
22. Theorems on the Nonexistence of Solutions for Systems of Quasilinear Elliptic Differential Inequalities	84
23. Nonexistence of Positive Solutions for One Class of Weakly Coupled Systems	90
24. Strongly Coupled Systems	93

Part II. FIRST-ORDER EVOLUTION PROBLEMS

25. INTRODUCTION	97
Chapter 3. EVOLUTION INEQUALITIES	99
26. Second-Order Semilinear Equations and Inequalities	99
27. Second-Order Evolution Inequalities with Critical Degeneracy	105

28. Second-Order Parabolic Problems with Local (Complete and Instantaneous) Blow-up of Solutions	108
29. Higher Order Semilinear Equations and Inequalities	115
30. Higher Order Evolution Inequalities with Subcritical Degeneracy	118
31. Higher Order Evolution Inequalities with Critical Degeneracy	127
32. Semilinear Inequalities in a Cone	129
33. Second-Order Equations and Inequalities with Nonlinear Principal Part	140
Chapter 4. SYSTEMS OF INEQUALITIES	152
34. Systems of Second-Order Semilinear Equations and Inequalities	152
35. Systems of Second-Order Semilinear Equations and Inequalities with Subcritical Degeneracy ..	157
36. Systems of Second-Order Semilinear Equations and Inequalities with Critical Degeneracy	163
37. Systems of Second-Order Semilinear Singular Inequalities	166
38. Systems of Higher Order Semilinear Equations and Inequalities	168
39. Systems of Parabolic Inequalities with Operators of Mean Curvature Type	178
40. Systems of Parabolic Equations and Inequalities with Nonlinear Principal Part	181
41. Certain General Systems of Parabolic Inequalities with Nonlinear Principal Part	196
42. Estimates of Solutions to Second-Order Parabolic Systems in the Neighborhood of a Blow-up Point	204
<hr/>	
Part III. SECOND-ORDER EVOLUTION PROBLEMS	
43. INTRODUCTION	209
Chapter 5. ENERGY METHOD AND PROBLEMS WITH COMPACT SUPPORT	215
44. An Abstract Scheme and Applications	215
45. The Cauchy Problem with Compact Support	220
Chapter 6. METHOD OF TEST FUNCTIONS AND PROBLEMS WITH NONCOMPACT SUPPORT	227
46. Higher Order Nonlinear Problems with Noncompact Support	227
47. Higher Order Equations	236
48. Higher Order Quasilinear Differential Inequalities with Essentially Variable Coefficients	239
49. Equations with Nonlocal Nonlinearity	246
Chapter 7. DEGENERATE AND SINGULAR HYPERBOLIC PROBLEMS IN \mathbb{R}_+^{N+1}	250
50. Hyperbolic Inequalities with Subcritical Degeneracy	250
51. A Second-Order Model Problem with Critical Degeneracy	260
52. Hyperbolic Problems with Local (Complete and Instantaneous) Blow-up of a Solution	267
53. Problem with Supercritical Degeneracy	276
54. Dependence of the Critical Exponent on the Choice of the Function Space	279
Chapter 8. VARIATIONAL METHOD: PERIODIC SOLUTIONS	283
55. Existence of Periodic Solutions to Nonlinear Hyperbolic Equations	283
56. The First Hyperbolic Variational Identity. Nonexistence of Periodic Solutions. Examples	293

Chapter 9. COMPARISON METHOD FOR A SYSTEM OF WAVE EQUATIONS	304
57. Systems of Inequalities: Subcritical Case	304
58. Blow-up of Solutions to a Hyperbolic System: Critical Case for $N = 3$	312
Chapter 10. NONEXISTENCE OF SOLUTIONS TO SYSTEMS OF INEQUALITIES	319
59. Nonexistence of Solutions to Hyperbolic Systems with Noncompact Support	319
60. Nonexistence of Solutions for Mixed-Type Systems	327

APPENDICES

A. Semilinear Differential Inequalities on the Heisenberg Group	330
B. Nonexistence of Solutions to Evolution Differential Inequalities of Higher Order	340
REFERENCES	354
