|                                                                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Asymptotic Behavior of Covering Curves on the Universal Coverings of Surfaces<br><i>D. V. Anosov and E. V. Zhuzhoma</i>                                              | 1   |
| The Riemann–Hilbert Problem on a Compact Riemannian Surface<br><i>A. A. Bolibruch</i>                                                                                | 47  |
| Éventails associés à des fonctions analytiques<br><i>J. Briançon, Ph. Maisonobe et M. Merle</i>                                                                      | 61  |
| Locally Quasi-Homogeneous Free Divisors Are Koszul Free<br><i>F. Calderón-Moreno and L. Narváez-Macarro</i>                                                          | 72  |
| Équations fonctionnelles associées à des fonctions analytiques<br><i>J. Briançon, Ph. Maisonobe et M. Merle</i>                                                      | 77  |
| Free Divisors and Duality for $\mathcal{D}$ -Modules<br><i>F. J. Castro-Jiménez and J. M. Ucha</i>                                                                   | 88  |
| Thom–Sebastiani Construction and Monodromy of Polynomials<br><i>A. Dimca and A. Némethi</i>                                                                          | 97  |
| Algebraic Characterization of the Monodromy of Generalized Knizhnik–Zamolodchikov<br>Equations of $B_n$ Type<br><i>V. A. Golubeva and V. P. Lixin</i>                | 115 |
| Integrals with Respect to the Euler Characteristic over Spaces of Functions and the Alexander<br>Polynomial<br><i>S. M. Gusein-Zade, F. Delgado, and A. Campillo</i> | 134 |
| On the Deligne–Simpson Problem<br><i>V. P. Kostov</i>                                                                                                                | 148 |
| On Fuchsian Systems with Decomposable Monodromy<br><i>S. Malek</i>                                                                                                   | 186 |
| Vanishing Cycles and Hermitian Duality<br><i>C. Sabbah</i>                                                                                                           | 194 |
