Volume 224, 1999

A Few Words about L. S. Pontryagin and His Scientific Activity <i>E. F. Mishchenko</i>	1
Mathematical Work of L. S. Pontryagin <i>R. V. Gamkrelidze</i>	8
On the Lifts to the Plane of Semileaves of Foliations on the Torus with a Finite Number of Singularities <i>D. V. Anosov</i>	20
Relatives of the Quotient of the Complex Projective Plane by the Complex Conjugation <i>V. I. Arnold</i>	46
Amenability and Paradoxical Decompositions for Pseudogroups and for Discrete Metric Spaces <i>T. Ceccherini-Silberstein, R. Grigorchuk, and P. de la Harpe</i>	57
On Fuchsian Systems with Given Asymptotics and Monodromy <i>A. A. Bolibruch</i>	98
Ramified Characters of Idèle Groups of One-Class Quadratic Fields <i>V. S. Vladimirov</i>	107
To the Theory of Many-Person Differential Games <i>N. L. Grigorenko</i>	115
Remarks on the Loop Groups of Compact Lie Groups and the Diffeomorphism Group of the Circle <i>V. A. Zaitseva, V. V. Kruglov, A. G. Sergeev, M. S. Strigunova, and K. A. Trushkin</i>	124
Optimal Synthesis Containing Successively Inserted Chattering Bundles <i>M. I. Zelikin</i>	137
Universal Feedback Control via Proximal Aiming in Problems of Control under Disturbance and Differential Games <i>F. H. Clarke, Yu. S. Ledyev, and A. I. Subbotin</i>	149
Solution to Singularly Perturbed Boundary Value Problems by the Duck Hunting Method <i>A. Yu. Kolesov, E. F. Mishchenko, and N. Kh. Rozov</i>	169
On Some Control Problems <i>N. N. Krasovskii</i>	189
On Two-Dimensional Reduction in a Differential Game of Quality <i>A. V. Kryazhinskii and Yu. S. Osipov</i>	198
Pontryagin's Alternated Integral in the Theory of Control Synthesis <i>A. B. Kurzhanski</i>	212

Local Combinatorial Hirzebruch Formula	
<i>A. S. Mishchenko</i>	226
Certain Covering Theorems and Their Application in Control Theory	
<i>M. S. Nikol'skii</i>	240
Difference Schrödinger Operators	
<i>S. P. Novikov</i>	250
On a Ring of Formal Pseudodifferential Operators	
<i>A. N. Parshin</i>	266
Naturalness and Totality of Cohomology Operations	
<i>M. M. Postnikov</i>	281
An Iterative Procedure for Constructing Minimax and Viscosity Solutions to the Hamilton–Jacobi Equations and Its Generalization	
<i>A. I. Subbotin and A. G. Chentsov</i>	286
