Modern Mathematical Physics: What Is It? <i>L. D. Faddeev</i>	1
On the Background Method and the Renormalization of the Dirichlet Functional in the <i>AdS/CFT</i> Correspondence <i>I. Ya. Aref'eva</i>	5
Simple Singularities of Curves <i>V. I. Arnold</i>	20
The Probabilities of Survival and Hopping of States in the Phase Model on a Finite Lattice <i>N. M. Bogolyubov, A. G. Izergin, N. A. Kitanin, and A. G. Pron'ko</i>	29
Bäcklund and Darboux Transformations for the Nonstationary Schrödinger Equation <i>M. Boiti, F. Pempinelli, A. Pogrebkov, and B. Prinari</i>	42
Liouville Central Charge in Quantum Teichmüller Theory <i>R. M. Kashaev</i>	63
The Form Factors in a Finite Volume <i>V. E. Korepin and N. A. Slavnov</i>	72
Twist-Related Geometries on q-Minkowski Space <i>P. P. Kulish and A. I. Mudrov</i>	86
On the Elimination of the Stueckelberg Divergences in the Hamiltonian Field Theory <i>V. P. Maslov and O. Yu. Shvedov</i>	100
Canonicity of Bäcklund Transformation: <i>r</i> -Matrix Approach. II <i>E. K. Sklyanin</i>	121
Multifield Formulation of Lattice Gauge Theories <i>A. A. Slavnov</i>	127
Combinatorial Identities Related to Representations of $U_q(\widetilde{\mathfrak{gl}}_2)$ <i>V. O. Tarasov</i>	138
Quantum Mapping Class Group, Pentagon Relation, and Geodesics <i>V. V. Fock and L. O. Chekhov</i>	149
Physicomathematical Interactions: The Chern–Simons Story <i>S. Deser</i>	164

Singleton Physics	
<i>M. Flato, C. Frønsdal, and D. Sternheimer</i>	170
Dynamical Poincaré Symmetry Realized by Field-Dependent Diffeomorphisms	
<i>R. Jackiw and A. P. Polychronakos</i>	178
Product Representations and the Quantization of Constrained Systems	
<i>J. R. Klauder</i>	197
To Gauge Theory from a Minimum of <i>a priori</i> Structure	
<i>G. Mack</i>	208
Interacting Knots	
<i>A. J. Niemi</i>	217
