Andrei Mikhailovich Zubkov: On the occasion of his 75th birthday	1
Vladimir Alekseevich Vatutin: On the occasion of his 70th birthday	3
On the Local Time of a Stopped Random Walk Attaining a High Level <i>V. I. Afanasyev</i>	5
Capacity of the Range of Branching Random Walks in Low Dimensions <i>Tianyi Bai and Yueyun Hu</i>	26
Characterization of Large Deviation Probabilities for Regenerative Sequences <i>G. A. Bakay</i>	40
Structure of the Population of Particles for a Branching Random Walk in a Homogeneous Environment <i>D. M. Balashova and E. B. Yarovaya</i>	57
Fluctuations of the Rightmost Particle in the Catalytic Branching Brownian Motion <i>Sergey S. Bocharov</i>	72
First Hitting Time of a High Level by a Catalytic Branching Walk <i>E. Vl. Bulinskaya</i>	97
Crossing an Asymptotically Square-Root Boundary by the Brownian Motion <i>Denis E. Denisov, Günter Hinrichs, Alexander I. Sakhanenko, and Vitali I. Wachtel</i>	105
Intermediately Subcritical Branching Process in a Random Environment: The Initial Stage of the Evolution <i>E. E. Dyakonova</i>	121
A Scaling Limit Theorem for Galton–Watson Processes in Varying Environments <i>Rongjuan Fang, Zenghu Li, and Jiawei Liu</i>	137
Convergence in L^p for a Supercritical Multi-type Branching Process in a Random Environment <i>Ion Grama, Quansheng Liu, and Erwan Pin</i>	160
Conditional L^1 -Convergence for the Martingale of a Critical Branching Process in Random Environment <i>Wenming Hong, Shengli Liang, and Xiaoyue Zhang</i>	184
Superprocesses for the Population of Rabbits on Grassland <i>Lina Ji and Jie Xiong</i>	195
On the Genealogical Structure of Critical Branching Processes in a Varying Environment <i>Götz Kersting</i>	209
Method of Moments and Sums of Random Indicators <i>V. A. Kopyttsev and V. G. Mikhailov</i>	220

<i>k</i> -Configurations <i>F. M. Malyshev</i>	233
On Series of <i>H</i> -Equivalent Tuples in Markov Chains <i>V. G. Mikhailov, A. M. Shoitov, and A. V. Volgin</i>	254
The Limiting Distribution of the Hook Length of a Randomly Chosen Cell in a Random Young Diagram <i>Ljuben R. Mutafchiev</i>	268
Sizes of Trees in a Random Forest and Configuration Graphs <i>Yu. L. Pavlov and I. A. Cheplyukova</i>	280
Large Deviations of a Strongly Subcritical Branching Process in a Random Environment <i>A. V. Shklyaeu</i>	298
The Probability of Reaching a Receding Boundary by a Branching Random Walk with Fading Branching and Heavy-Tailed Jump Distribution <i>P. I. Tesemnikov and S. G. Foss</i>	318
Critical Branching Processes in a Random Environment with Immigration: The Size of the Only Surviving Family <i>V. A. Vatutin and C. Smadi</i>	336
Moment Characteristics of a Random Mapping with Restrictions on Component Sizes <i>A. L. Yakymiv</i>	356
