Vol. 288, Suppl. 1, 2015

Vitalii Ivanovich Berdyshev (On the Occasion of His 75th Birthday)	S1
Best Approximation of the Differentiation Operator on the Class of Functions Analytic in a Strip	
<i>R. R. Akopyan</i>	S5
The Bernstein–Szegő Inequality for Fractional Derivatives of Trigonometric Polynomials	
<i>V. V. Arestov and P. Yu. Glazyrina</i>	S13
Lower Estimates for the Error of Approximation of Derivatives for Composite Finite Elements with Smoothness Property	
<i>N. V. Baidakova</i>	S29
Linear Approximation of Vector Functions	
<i>V. I. Berdyshev</i>	S40
Asymptotics of the Optimal Time in a Time-Optimal Problem with Two Small Parameters	
<i>A. R. Danilin and O. O. Kovrizhnykh</i>	S46
On the Stability of a Procedure for Solving a Minimax Control Problem for a Positional Functional	
<i>M. I. Gomoyunov and N. Yu. Lukoyanov</i>	S54
An Estimate of an Optimal Argument in the Sharp Multidimensional Jackson–Stechkin L_2 -Inequality	
<i>D. V. Gorbachev</i>	S70
Adaptive Stability in Combinatorial Optimization Problems	
<i>E. E. Ivanko</i>	S79
Generalized Jackson Inequality in the Space $L_2(\mathbb{R}^d)$ with Dunkl Weight	
<i>V. I. Ivanov and Ha Thi Minh Hue</i>	S88
The Extremal Function in the Delsarte Problem of Finding an Upper Bound for the Kissing Number in the Three-Dimensional Space	
<i>N. A. Kuklin</i>	S99
On Extensions of Exceptional Strongly Regular Graphs with Eigenvalue 3	
<i>A. A. Makhnev and D. V. Paduchikh</i>	S112
On the Coincidence of Grünberg–Kegel Graphs of a Finite Simple Group and Its Proper Subgroup	
<i>N. V. Maslova</i>	S129
On One Class of Differential Operators and Their Application	
<i>V. V. Napalkov and A. U. Mullabaeva</i>	S142
On the Pseudovariety Generated by All Finite Monoids Satisfying $\mathcal{R} = \mathcal{H}$	
<i>T. V. Pervukhina</i>	S156
Construction of Orthogonal Multiwavelet Bases	
<i>E. A. Pleshcheva and N. I. Chernykh</i>	S162

Dual Approach to the Application of Barrier Functions for the Optimal Correction of Improper Linear Programming Problems of the First Kind	
<i>L. D. Popov</i>	S173
One Method for Solving Systems of Nonlinear Partial Differential Equations	
<i>L. I. Rubina and O. N. Ul'yanov</i>	S180
Local Exponential Splines with Arbitrary Knots	
<i>E. V. Strelkova and V. T. Shevaldin</i>	S189
The Rate of the Smallest Value of the Weighted Measure of the Nonnegativity Set for Polynomials with Zero Mean Value on a Closed Interval	
<i>K. S. Tikhonovtseva</i>	S195
Description of a Helical Motion of an Incompressible Nonviscous Fluid	
<i>V. P. Vereshchagin, Yu. N. Subbotin, and N. I. Chernykh</i>	S202
A Solution Class of the Euler Equation in a Torus with Solenoidal Velocity Field	
<i>V. P. Vereshchagin, Yu. N. Subbotin, and N. I. Chernykh</i>	S211
Fifty Years of Schoenberg's Problem on the Convergence of Spline Interpolation	
<i>Yu. S. Volkov and Yu. N. Subbotin</i>	S222
