

Contents

Vol. 62, No. 1, 2020

Compounds of Xenon in the Chemistry of Actinides <i>A. V. Ananyev and V. P. Shilov</i>	1
Cation–Cation Interaction in Complexes of Np(V) Benzoate and Salicylate with N-containing Molecular Ligands <i>I. A. Charushnikova, N. N. Krot, and V. P. Perminov</i>	9
Kinetics of Pu(VI) Reaction with Ethylenediaminetetraacetic Acid <i>A. M. Fedoseev and V. P. Shilov</i>	18
Approaches to a Mathematical Modeling of the Density of Nitrate Solutions on the Basis of Concepts of Apparent Molar Volume As Applied to Hydrometallurgical Processes of the Nuclear Fuel Cycle <i>E. A. Puzikov, B. Ya. Zilberman, I. V. Blazheva, E. V. Andreeva, N. D. Goletskii, and A. S. Kudinov</i>	22
On the Possibility of Extractive Fractionation of REEs and TPUs from Weakly Acid Raffinate Produced of Irradiated Fuel Elements with a Mixture of ChCD and D2EHPA in Polar Solvent <i>D. N. Shishkin, N. K. Petrova, and N. D. Goletskii</i>	31
Extraction of Uranium(VI) Ions from Sulfate Medium Using Synthesized <i>o</i> -(1- $\{E\}$ -[1-(<i>o</i> -Hydroxyphenyl)ethylidene]-hydrazono}ethyl)phenol <i>D. A. Ismaiel</i>	37
Extraction of U(VI) from Aqueous Media with Layered Zn,Al and Mg,Al Double Hydroxides Intercalated with Citrate Ions and with Their Magnetic Nanocomposites <i>L. N. Puzyrnaya, G. N. Pshinko, B. Yatsik, V. Ya. Zub, and A. A. Kosorukov</i>	50
A Chemometric Study of the Adsorption of Zr(IV) Ions from Aqueous Solutions onto TBP-Surface-Modified Magnetic Fe ₃ O ₄ Nanoparticles as a New Adsorbent <i>A. R. Behnam-Saba, K. Saberyan, A. Nezhadali, and H. Adelkhani</i>	62
Potentiality of Using Ascorbic Acid for Selective Recovery of Uranium from Egyptian Monazite <i>T. E. Amer, M. A. Gado, B. Attia, and E. M. El-Sheikh</i>	73
Setup and Technique for Measuring Photon Flux of ¹⁵³ Gd Sources <i>N. F. Demchenko, A. V. Dudun, and M. M. Salikov</i>	80
Interaction of Microelements at Coprecipitation with Humic Acids <i>E. V. Polyakov, I. V. Volkov, A. A. Ioshin, M. Ya. Chebotina, and V. P. Guseva</i>	85
Determination of ²³² U and ²³⁶ Pu Weight Contents of Spent Nuclear Fuel <i>V. N. Momotov, E. A. Erin, A. Yu. Volkov, and A. Yu. Baranov</i>	95
Study of Reactions between Fluoro-substituted Nucleogenic Phenyl Cations and Benzopyridine Derivatives <i>N. E. Shchepina, V. V. Avrorin, G. A. Badun, S. N. Shurov, and R. V. Shchepin</i>	101
Design, Synthesis, and In Silico Evaluation of Methyl 2-(2-(5-Bromo/chloro-2-oxobenzoxazol-3(2 <i>H</i>)-yl)acetamido)-3-phenylpropanoate for TSPO Targeting <i>P. Srivastava, P. Kumar, and Anjani Kumar Tiwari</i>	107

Radiosynthesis and Bioevaluation of Ranitidine as Highly Selective Radiotracer for Peptic Ulcer Disorder Detection <i>M. H. Sanad, F. A. Rizvi, and R. R. Kumar</i>	119
Examination of Total Gross Activity and Uranium Isotope Content in Thermal Waters in Bosnia and Herzegovina <i>M. Nuhanović, N. Drešković, A. Mujezinović, and M. Mulić</i>	125
Radiation and Chemical Stability of a Magnesium-Phosphate Matrix for ^{14}C Immobilization <i>A. A. Lizin, D. M. Yandaev, A. Yu. Shadrin, M. Yu. Kalenova, A. V. Dmitrieva, S. V. Tomilin, I. S. Golubenko, M. I. Khamdeev, V. N. Momotov, D. E. Tikhonova, O. S. Dmitrieva, A. A. Kolobova, S. S. Poglyad, M. V. Dodonova, S. E. Vinokurov, and B. F. Myasoedov</i>	131
Content of Long-Lived Radionuclides of Carbon-14 and Chlorine-36 in Reactor Graphite and in the Biosphere (Is there a Problem with Carbon-14 and Chlorine-36 when It Comes to the Processing of Reactor Graphite?) <i>B. F. Petrova and Yu. A. Pokhitonov</i>	138
