|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Use of Redox Reagents for Stabilization of Pu and Np Valence Forms in Aqueous Reprocessing of Spent Nuclear Fuel: Chemical and Technological Aspects<br><i>V. I. Marchenko, K. N. Dvoeglazov, and V. I. Volk</i>                                     | 329 |
| Crystal and Molecular Structure of Uranyl Acetylacetonate Dimer, $[\text{UO}_2(\text{C}_5\text{H}_7\text{O}_2)_2]_2$<br><i>G. V. Sidorenko, M. S. Grigor'ev, V. V. Gurzhiy, D. N. Suglobov, and I. G. Tananaev</i>                                   | 345 |
| Formation of Volatile Neptunium Trioxide $\text{NpO}_3$ and Two Other Products of Neptunium Oxidation<br><i>V. P. Domanov</i>                                                                                                                        | 350 |
| Reduction of $\text{Np(V)}$ with $\text{Fe(II)}$ in Weakly Acidic Solutions Containing $\text{H}_2\text{C}_2\text{O}_4$<br><i>M. K. Savushkina, A. M. Fedoseev, V. P. Shilov, V. A. Kravchenko, and I. E. Polyakov</i>                               | 354 |
| Extraction of $\text{U(VI)}$ and $\text{Th(IV)}$ from Nitric Acid Solutions with Tetraaryl-Substituted ( <i>o</i> -Phenyleneoxymethylene)diphosphine Dioxides<br><i>A. N. Turanov, V. K. Karandashev, A. N. Yarkevich, and V. E. Baulin</i>          | 359 |
| A Preliminary Study of Dihydroxyurea Application in Plutonium Purification Cycle<br><i>Xian Liang, Yan Taihong, Zheng Weifang, Zhang Baiqing, and Zhang Yu</i>                                                                                       | 365 |
| Disproportionation of Polymeric $\text{Pu(IV)}$ in Weakly Acidic Solutions<br><i>Yu. M. Kulyako, S. A. Perevalov, T. I. Trofimov, D. A. Malikov, S. E. Vinokurov, M. D. Samsonov, and B. F. Myasoedov</i>                                            | 368 |
| Sorption of $\text{Pu(IV)}$ in the Polymeric Colloidal Form on Rock Typical of Mayak Production Association Area<br><i>S. A. Perevalov, Yu. M. Kulyako, S. E. Vinokurov, B. F. Myasoedov, Ai Fujiwara, and O. Tochiyama</i>                          | 373 |
| Sorption of $\text{U(VI)}$ on Montmorillonite with Aluminum and Iron Hydroxides Deposited on Its Surface, Studied in the Presence of Citric and Oxalic Acids<br><i>S. A. Kobets, G. N. Pshinko, and A. A. Bogolepov</i>                              | 378 |
| Transuranium Elements in Liquid Radioactive Wastes from the Shelter<br><i>A. A. Odintsov, V. E. Khan, V. A. Krasnov, E. M. Pazukhin, and V. N. Shcherbin</i>                                                                                         | 383 |
| $^{220}\text{Rn}$ as an Additional Factor of Radiation Hazard in the Shelter<br><i>B. I. Ogorodnikov, A. K. Budyka, V. E. Khan, E. M. Pazukhin, V. P. Koval'chuk, and V. A. Krasnov</i>                                                              | 390 |
| Thermal Dissociation of the Complex $\text{BF}_3\cdot\text{D}$ and Boron Isotope Separation in the System $\text{BF}_3\text{--BF}_3\cdot\text{CH}_3\text{NO}_2$<br><i>A. V. Khoroshilov, A. V. Lizunov, A. V. Stepanov, and S. A. Cherednichenko</i> | 400 |
| Extraction of Eu and Am with Extractants Based on Carbamoyl Phosphine Oxide (CMPO)<br><i>M. S. Agafonova-Moroz, L. V. Krasnikov, N. E. Mishina, A. Yu. Shadrin, and O. V. Shmidt</i>                                                                 | 403 |
| Precipitation of Cesium Jointly with Uranium from Nitric Acid Liquid Radioactive Wastes to Obtain Solid Matrices for Long-Term Storage<br><i>Yu. I. Korneiko, A. A. Murzin, and O. V. Shmidt</i>                                                     | 406 |
| Treatment of Gas–Air Flows to Remove Radioiodine Using Metallic Copper<br><i>M. M. Metalidi, V. I. Beznosyuk, N. N. Kalinin, A. B. Kolyadin, and Yu. S. Fedorov</i>                                                                                  | 409 |
| Immobilization of Tritium-Containing Oil Wastes by Their Incorporation in a Cement Matrix<br><i>A. B. Sazonov, A. V. Aleshina, and E. P. Magomedbekov</i>                                                                                            | 412 |
| Sorption of $^{137}\text{Cs}$ and $^{90}\text{Sr}$ by Potassium Production Wastes, Clay–Salt Slimes<br><i>V. S. Labko</i>                                                                                                                            | 415 |

|                                                                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Reagent Treatment of $^{226}\text{Ra}$ -Contaminated Soils in the Dynamic Mode<br><i>Yu. G. Sklifasovskaya, V. B. Nikolaevskii, and L. B. Prozorov</i>                                                  | 418 |
| Influence of Time Factor on Antimigration Properties of a Barrier Based on Sand–Clay Rocks<br><i>M. N. Sabodina, E. V. Zakharova, M. V. Mironenko, and A. A. Menyailo</i>                               | 422 |
| Hydrochemical Zoning Studies in Assessment of Geoecological Safety<br>of Near-Surface Radioactive Waste Repositories<br><i>M. M. Khakhunova and L. B. Prozorov</i>                                      | 425 |
| Problems of Ranging of Radioactive Waste Storage and Disposal Objects and Their Solution<br>Using a Database<br><i>O. N. Ushanova, V. I. Korzh, L. A. Kuznetsov, A. S. Khardina, and E. V. Novikova</i> | 429 |
| Main Technical Solutions in the World Practice of Conditioning of HLW Solutions<br>from Spent Nuclear Fuel Reprocessing<br><i>A. A. Cherepanov and D. E. Belokon</i>                                    | 433 |
| A Competent and Readily Understandable Book on Radiation for a Wide Range of Readers<br><i>S. S. Berdonosov</i>                                                                                         | 436 |
