|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Physicochemical Properties of Uranium in Lower Oxidation States<br><i>S. A. Kulyukhin, N. B. Mikheev, A. N. Kamenskaya, N. A. Konovalova, and I. A. Rumer</i>                                                                                                                                                                                                                                                                                 | 535 |
| Geometric Isomerism of Layered Complexes of Uranyl Selenates: Synthesis and Structure of $(\text{H}_3\text{O})[\text{C}_5\text{H}_{14}\text{N}]_2[(\text{UO}_2)_3(\text{SeO}_4)_4(\text{HSeO}_4)(\text{H}_2\text{O})]$ and $(\text{H}_3\text{O})[\text{C}_5\text{H}_{14}\text{N}]_2[(\text{UO}_2)_3(\text{SeO}_4)_4(\text{HSeO}_4)(\text{H}_2\text{O})](\text{H}_2\text{O})$<br><i>S. V. Krivovichev, I. G. Tananaev, and B. F. Myasoedov</i> | 552 |
| Lanthanides in Phosphates with the Structure of Whitlockite Mineral [Analog of $\beta\text{-Ca}_3(\text{PO}_4)_2$ ]<br><i>A. I. Orlova, M. P. Orlova, E. M. Solov'eva, E. E. Loginova, V. T. Demarin, G. N. Kazantsev, S. G. Samoilov, and S. V. Stefanovskii</i>                                                                                                                                                                             | 561 |
| Thermochemistry and Thermal Characteristics of $\text{Ba}_2\text{M}^{\text{II}}\text{UO}_6$ ( $\text{M}^{\text{II}} = \text{Mg, Ca, Sr, Ba}$ )<br><i>A. V. Knyazev, N. G. Chernorukov, M. G. Zhizhin, Yu. S. Sazhina, and A. V. Ershova</i>                                                                                                                                                                                                   | 568 |
| Oxidation of U(III) with Water in the Course of Precipitation of Its Solid Compounds from Aqueous Solutions<br><i>A. M. Fedoseev, A. B. Yusov, and V. F. Peretrukhin</i>                                                                                                                                                                                                                                                                      | 572 |
| Extraction of Thorium with Tributyl Phosphate from Chloride Solutions<br><i>V. G. Maiorov, A. I. Nikolaev, O. P. Adkina, and G. B. Mazunina</i>                                                                                                                                                                                                                                                                                               | 576 |
| Extraction and Sorption Preconcentration of U(VI), Am(III), and Pu(IV) from Nitric Acid Solutions with Alkylenediphosphine Dioxides<br><i>V. P. Morgalyuk, N. P. Molochnikova, G. V. Myasoedova, and I. G. Tananaev</i>                                                                                                                                                                                                                       | 580 |
| Effects of EDTA and NTA on Sorption of U(VI) on the Clay Fraction of Soil<br><i>B. Yu. Kornilovich, G. N. Pshinko, and A. A. Bogolepov</i>                                                                                                                                                                                                                                                                                                    | 584 |
| Determination of $^{137}\text{Cs}$ in Seawater Under the Field Conditions<br><i>V. N. Kosyakov, A. N. Veleshko, and I. E. Veleshko</i>                                                                                                                                                                                                                                                                                                        | 589 |
| Distribution of $^{226}\text{Ra}$ and $^{232}\text{Th}$ on the Radium Production Waste Repository Site<br><i>I. I. Shuktomova and L. M. Noskova</i>                                                                                                                                                                                                                                                                                           | 593 |
| Trends in Radiochemical Research: A Finnish View<br><i>J. Lehto</i>                                                                                                                                                                                                                                                                                                                                                                           | 597 |
| Separation of $^{236}\text{Pu}$ and $^{237}\text{Pu}$ Tracers from Weighable Amounts of Uranium and Neptunium Using Anion-Exchange Resin and TRU Resin<br><i>J. Aaltonen, E. A. Gromova, K. Helariutta, and V. A. Jakovlev</i>                                                                                                                                                                                                                | 599 |
| Training of Finnish Radiochemists in the Production of Short-Lived Transuranic Nuclides<br><i>E. A. Gromova, V. A. Jakovlev, J. Aaltonen, H. Ervanne, K. Helariutta, A. Lunden, S. Makkonen-Craig, O. Perhola, S. Salminen, and H. Tuovinen</i>                                                                                                                                                                                               | 603 |
| Alpha/Beta Liquid Scintillation Spectrometry in Surveying Finnish Groundwater Samples<br><i>L. Salonen</i>                                                                                                                                                                                                                                                                                                                                    | 606 |
| Radiography and Local Microanalysis for Detection and Examination of Actinide-Containing Microparticles<br><i>I. E. Vlasova, S. N. Kalmykov, Yu. A. Sapozhnikov, S. G. Simakin, A. Yu. Anokhin, R. A. Aliev, and D. A. Tsarev</i>                                                                                                                                                                                                             | 613 |
| Artificial Radioactivity of the White Sea<br><i>R. A. Aliev, V. A. Bobrov, S. N. Kalmykov, A. P. Lisitsyn, M. S. Mel'gunov, A. N. Novigatskii, A. V. Travkina, and V. P. Shevchenko</i>                                                                                                                                                                                                                                                       | 620 |

|                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------|-----|
| Artificial Radioactivity in Human Body and the Environment<br><i>T. Rahola, R. Saxen, E. Kostiainen, and M. Puhakainen</i>            | 626 |
| $^{210}\text{Po}$ and $^{210}\text{Pb}$ in the Food Chain Lichen–Reindeer–Human<br><i>D. Solatie, M. Junttila, and P. Vesterbacka</i> | 632 |
