Contents

Vol. 18, Nos. 1–2, 2013
Distributed worldwide by Springer. *Regular and Chaotic Dynamics* ISSN 1560-3547.

On the Dynamic Markov–Dubins Problem: from Path Planning in Robotic and Biolocomotion to Computational Anatomy
Alex Lúcio Castro and Jair Koiller 1

Dynamics and Self-Propulsion of a Spherical Body Shedding Coaxial Vortex Rings in an Ideal Fluid
Phanindra Tallapragada and Scott David Kelly 21

The Dynamics of Vortex Rings: Leapfrogging, Choreographies and the Stability Problem
Alexey V. Borisov, Alexander A. Kilin, and Ivan S. Mamaev 33

An Amphibious Vibration-driven Microrobot with a Piezoelectric Actuator
Felix Becker, Klaus Zimmermann, Tatiana Volkova, and Vladimir T. Minchenya 63

On the Optimal Shape of Magnetic Swimmers
Hermes Gadêlha 75

Optimal Control of Vibrationally Excited Locomotion Systems
Felix L. Chernousko, Nikolai N. Bolotnik and Tatiana Yu. Figurina 85

The Self-propulsion of a Body with Moving Internal Masses in a Viscous Fluid
Evgeny V. Vetchanin, Ivan S. Mamaev, and Valentin A. Tenenev 100

Normal and Hemiparetic Walking
Friedrich Pfeiffer and Eberhard König 118

On the Dynamic Model and Motion Planning for a Spherical Rolling Robot Actuated by Orthogonal Internal Rotors
Mikhail Svinin, Akihiro Morinaga, and Motoji Yamamoto 126

How to Control the Chaplygin Ball Using Rotors. II
Alexey V. Borisov, Alexander A. Kilin, and Ivan S. Mamaev 144

On the Motion of a Mechanical System Inside a Rolling Ball
S. V. Bolotin and T. V. Popova 159

Quaternion Solution for the Rock'n'roller: Box Orbits, Loop Orbits and Recession
Peter Lynch and Miguel D. Bustamante 166

Falling Motion of a Circular Cylinder Interacting Dynamically with a Point Vortex
Sergei V. Sokolov and Sergei M. Ramodanov 184

Vortex Pairs and Dipoles
Stefan G. Llewellyn Smith and Raymond J. Nagem 194
