Vol. 17, No. 2, 2012
Distributed worldwide by Springer. *Regular and Chaotic Dynamics* ISSN 1560-3547.

Escape Distribution for an Inclined Billiard
Alan Roy and Nikolaos Georgakarakos 113

Typical Singularities of Polymorphisms Generated by the Problem of Destruction of an Adiabatic Invariant
Pavel E. Golubtsov 122

On Invariant Manifolds of Nonholonomic Systems
Valery V. Kozlov 131

On a Periodic Motion of a Rigid Body Carrying a Material Point in the Presence of Impacts with a Horizontal Plane
Anatoly P. Markeev 142

On the Stability of Thomson's Vortex Pentagon Inside a Circular Domain
Leonid G. Kurakin 150

Generalized Chaplygin's Transformation and Explicit Integration of a System with a Spherical Support
Alexey V. Borisov, Alexander A. Kilin, and Ivan S. Mamaev 170

Two Non-holonomic Integrable Problems Tracing Back to Chaplygin
Alexey V. Borisov and Ivan S. Mamaev 191

Dynamics Interpretari

On Some Generalization of the Area Theorem with Applications to the Problem of Rolling Balls
Sergey A. Chaplygin 199
