Contents

Vol. 17, No. 6, 2012
Distributed worldwide by Springer. *Regular and Chaotic Dynamics* ISSN 1560-3547.

Flat Metrics are Strict Local Minimizers for the Polynomial Entropy
Clémence Labrousse 479

Integrable Relativistic Systems Given by Hamiltonians with Momentum-spin-orbit Coupling
Alina Dobrogowska and Anatol Odzijewicz 492

On the Probability of the Outcomes in Buckling of an Elastic Beam
Michail Pivovarov 506

Dynamical Phenomena Occurring due to Phase Volume Compression in the Nonholonomic Model of the Rattleback
Alexey V. Borisov, Alexey Yu. Jalnine, Sergey P. Kuznetsov, Igor R. Sataev, and Julia V. Sedova 512

On the Orbital Stability of Planar Periodic Motions of a Rigid Body in the Bobylev–Steklov Case
B. S. Bardin, T. V. Rudenko, and A. A. Savin 533

Self-propulsion of a Body with Rigid Surface and Variable Coefficient of Lift in a Perfect Fluid
Sergey M. Ramodanov, Valentin A. Tenenev, and Dmitry V. Treschev 547

The Problem of Optimal Control of a Chaplygin Ball by Internal Rotors
Sergey Bolotin 559

Rolling of a Ball without Spinning on a Plane: the Absence of an Invariant Measure in a System with a Complete Set of Integrals
Alexey V. Bolsinov, Alexey V. Borisov, and Ivan S. Mamaev 571

An Extended Hamilton – Jacobi Method
Valery V. Kozlov 580

Addendum to "Progress in Celestial Mechanics" [RCD, 2012, vol. 17, no. 1, pp. 6–23]
Christian Marchal 597
