Structural Mechanics and Strength of Flight Vehicles

Effect of Heating on the Dynamic Behavior of a Shell with Partially Damaged Thermal Insulation <i>B. A. Antuf'ev and A. V. Konovalov</i>	1
A Technique of Computer-Aided Synthesizing a Finite Element Model of Wing Center Section and Outer Wing Torsion Box Joint for a Transport Aircraft <i>V. V. Borisov and V. V. Sukhov</i>	6
Mathematical Modeling of Unloading a Linear Shock Cord Used in Aircraft Engineering <i>T. Z. Gimadieva and R. Sh. Gimadiev</i>	14
Time-Dependent Stresses in a Beam Under a Load Moving Along Its Surface <i>T. D. Karimbaev and Sh. Mamaev</i>	21
On the Possibility of Structural Fatigue Properties Estimation at the Early Stages of Design Analysis <i>E. V. Kasumov</i>	30
Thermal Stresses in a Multilayer Hollow Cylinder under Thermal Shock on its External Surface <i>V. A. Kudinov, A. V. Eremin, A. E. Kuznetsova, and E. V. Stefanyuk</i>	37
Effect of Heating on the Load-Carrying Structure Mass <i>Z. J. Wang, L. H. Kang, S. Huang, and A. S. Kretov</i>	45

Flight Dynamics and Control of Flight Vehicles

Extreme Deviations of Landing Parameters for Heavy Aircraft <i>K. G. Denisov and N. E. Rodnishchev</i>	55
Synthesis of Sliding Modes in the Systems with Uncertain Disturbances and Measurement Errors <i>A. S. Meshchanov, S. Yu. Sevryugin, and A. F. Zaripova</i>	61

Aero- and Gas-Dynamics of Flight Vehicles and Their Engines

Conductance of the Channels and the Knudsen Paradox <i>K. B. Panfilovich</i>	71
---	----

Aircraft and Rocket Engine Design and Development

Structural Optimization of the Air-Blast Atomizer Based on Three-Dimensional Simulation Techniques <i>A. M. Sipatov, S. A. Karabasov, L. Yu. Gomzikov, T. V. Abramchuk, and G. N. Semakov</i>	75
--	----

Aircraft and Rocket Engine Theory

Enhancement of Heat Transfer for Turbulent Flow in Channels <i>V. V. Olimpiev[†] and B. G. Mirzoev</i>	84
A Technique of Design Analysis for the Gas Turbine Engine Regenerator with Complanar Channels According to the Heat Flow and Hydraulic Resistance <i>V. A. Trushin and A. Yu. Chechulin</i>	92
A Mathematical Model of Heat Shielding for a Nose Cone Taking Into Account Critical Flight Situations <i>F. A. Urazbakhtin, Yu. Yu. Kharinova, and V. F. Urazbakhtin</i>	100

TECHNICAL NOTES

Structural Mechanics and Strength of Flight Vehicles

Vibrations of an Elastic Guide Beam with a Missile Moving Along It <i>S. V. Russkikh</i>	107
---	-----
