RUSSIAN AERONAUTICS

PAGES
RUSSIAN/ENGLISH

FLIGHT VEHICLE DESIGN

Special features of optimizing a heat exchanger-condenser equipped with an antiicing system. A.V. Chichindayev	3	1
---	---	---

FLIGHT DYNAMICS AND CONTROL OF FLIGHT VEHICLES

Mathematical simulation of parachute extraction. T.Z. Gimadiyeva	7	7
Choice of transfer coefficients in stabilization laws for a training helicopter. V.S. Moiseyev, I.P. Ul'trivanov, I.V. Matveyev, and V.I. Ovchinnikov	11	13

AERO- AND GAS-DYNAMICS OF FLIGHT VEHICLES AND THEIR ENGINES

Experimental studies of a turbulent jet in the closed-end chamber. M.N. Gamrekeli	15	20
Calculation of unsteady compressible fluid flows in a pipeline. I.A. Dobodeich and Yu.P. Barmetov	18	24

AIRCRAFT AND ROCKET ENGINE DESIGN AND DEVELOPMENT

Comprehensive optimization of plans for the experimental study of aircraft gas turbine engine characteristics. A.S. Gishvarov	22	31
Combined planning of an experiment when simulating processes occurring in aircraft engineering articles. A.V. Zyryanov and A.G. Khleskin	26	38

AIRCRAFT AND ROCKET ENGINE THEORY

Special features of vibration combustion in a tube with the sudden change of the cross section. O.V. Beloded and V.M. Larionov	30	44
Unsteady effects and friction in the starting regime of power plants. Yu.G. Volodin, K.S. Fedorov, and M.V. Yakovlev	34	49
Experimental studies of processes of heat exchange and efficiency of a thermal curtain at injection of cooling air into a porous wall. A.G. Karimova, S.G. Dezider'ev, V.M. Zubarev, and M.G. Khabibullin	37	53
Numerical evaluation of the highest nitric oxide emission levels attainable when using the rich-lean combustion process in gte combustion chambers. Yu.G. Kutsenko	40	58

AIRCRAFT MEASURING AND COMPUTER SYSTEMS

Flight control of angular rate sensors with forced rotation. V.Yu. Chernov	43	62
--	----	----

AIRCRAFT PRODUCTION TECHNOLOGIES

Uniformity of dissipation of powder solder at manufacturing GTE honeycomb inserts. A.N. Lunev, S.V. Filippov, and A.Yu. Kazantsev	48	70
A model of blank transformation to the core of V-crimped sandwich panels. V.I. Khaliulin, A.A. Razdaibedin, and D.G. Menyashkin	52	75

AUTOMATION OF DESIGN AND PRODUCTION OF AERONAUTICAL EQUIPMENT

Calculation of moisture content influence on parameters of working bodies and processes in the DVGW system. I.M. Goryunov	57	83
--	----	----

TECHNICAL NOTES

AERO- AND GAS-DYNAMICS OF FLIGHT VEHICLES AND THEIR ENGINES

Problem of the separated flow around a plate with the deflected flap. L.G. Plotnikova	61	89
---	----	----

AIRCRAFT AND ROCKET ENGINE THEORY

Determination of hydraulic losses in the complex-shaped channels. I.A. Abrosimov, A.M. Turilov, E.A. Turilova, and G.M. Shalaev	64	93
Influence of the angle of attack on profile losses in turbine cascades. B.I. Mamayev and I.L. Osipov	66	95
Studies of secondary air ejection into the primary zone of GTE combustion chamber. B.G. Mingazov and I.A. Slobodyanskii.....	69	100

DISCUSSIONS

Ideal Brayton cycle functioning with a finite velocity as a sequence of dissipative structures. B.Kh. Perel'shtein	71	103
---	----	-----
