Vol. 55, No. 2, 2012

A simultaneous English language translation of this journal is available from Allerton Press, Inc.
Distributed worldwide by Springer. *Russian Aeronautics (Iz. VUZ)*, ISSN 1068-7998.

Flight Vehicle Design

The Concept of Selecting the Main Parameters of a Lightweight Airplane with Regard
to the Requirements of the Contemporary Russian Market

V. Yu. Demin and S. A. Yurgenson 113

Development of the Weight Formula for a Folding Wing

V. V. Yarygina and Yu. I. Popov 120

Structural Mechanics and Strength of Flight Vehicles

Formalization of Solving the Thermoelasticity Problems for Aircraft Structures

A. S. Kretov and Wang Zhijin 127

Approximate Technique of Tip Vortex Account in Calculating a Helicopter Main Rotor

A. Yu. Liss 136

Calculation of Flight Vehicle Main Support Wheel Vibrations Taking Into Account
Brake Forces

V. S. Metrikin, and M. A. Peisel' 144

Contemporary Approach to the Design-Systematic and Experimental Provision
of Autorotation Landing Safety for a Helicopter with Skid Type Landing Gear

S. A. Mikhailov and D. V. Nedel'ko 151

Flight Dynamics and Control of Flight Vehicles

Wavelet Filtering of Measurement Information in Unmanned Aerial Vehicle Control
System

L. Yu. Emaletdinova, S. A. Lyasheva, and M. P. Shleimovich 158

Statistical Analysis for Rotational Motion of a Light Descent Capsule under
Deployment of a Space Cable System

O. N. Naumov 164

Aero- and Gas-Dynamics of Flight Vehicles and Their Engines

Experimental Studies of Free Flow Boundaries Influence upon Aerodynamic
Characteristics of the Clean Large-Scale Models

V. V. Zherekhov and O. A. Ledyankina 170

Aircraft and Rocket Engine Theory

Calculation and Experimental Investigation of Mixture Formation in a Vortex Mixer

Sh. A. Piralishvili and R. I. Ivanov 179

Aircraft Instruments and Instrumentation Computer Complexes

A Starting System of Warning the Critical Conditions for a Single-Rotor Helicopter

V. M. Soldatkin, A. A. Arkhipov, V. A. Olaev, and A. A. Uglov 184

Aircraft Production Technology

Theoretical Determination of Shot Peening Process Parameters <i>Yu. P. Kataev</i>	192
An Engineering Technique for Evaluating the Highly-Porous Cellular Material Geometry <i>Yu. A. Kirsanov and E. I. Ivanova</i>	196

TECHNICAL NOTES

Flight Vehicle Design

Development of Control System Algorithms for Mini Unmanned Aerial Vehicle of Combined Scheme – Convertiplane <i>E. K. Syzdykov, A. V. Gainutdinova, and K. G. Krikun</i>	199
---	-----

Aircraft Production Technology

Assessment of GTE Parts Precision at Ion-Plasma Spraying of Coatings <i>V. V. Budilov, R. M. Kireev, and I. I. Yagafarov</i>	203
Comparative Analysis of Mixing Chambers for Two Multi-Phase Flows of Oppositely Charged Particles <i>M. P. Danilaev, S. A. Mikhailov, Yu. E. Pol'skii, and K. V. Faizullin</i>	208
Optimization of CNC Machine Multitool Operating Regimes <i>E. M. Korovin and R. Kh. Valiev</i>	212

Automation of Design and Production of Aeronautical Equipment

Research and Development Version of Computer-Aided System of Aircraft and Rocket-Space Equipment Vibration Tests <i>V. A. Komkov, V. V. Vasilevskii, V. F. Korolev, and Yu. V. Mozgovoi</i>	217
--	-----
