Vol. 59, No. 4, 2016

A simultaneous English language translation of this journal is available from Allerton Press, Inc.
Distributed worldwide by Springer. *Russian Aeronautics (Iz. VUZ)*, ISSN 1068-7998.

Aircraft Equipment

Optimization of Dynamic Performance for a Ground Catapult with Reusable Supply
of the Working Fluid

A. V. Ambrozhevich, K. V. Migalin, and V. A. Sereda 441

Flight Vehicle Design

Multi-criteria Analysis of High-Altitude UAV Concepts

V. S. Brusov and S. A. Piyavskii 447

Structural Mechanics and Strength of Flight Vehicles

Analysis of a Beam with a Crack under Irregular Cyclic Load

R. A. Kayumov, I. Z. Mukhamedova, and E. B. Tuisina 452

Development and Verification of an Analytic Technique to Determine the Stiffness
Parameters of Braided Tubular Parts

S. A. Samipur and Ya. S. Danilov 460

Thermally Excited Vibrations of Aircraft Structural Elements

E. I. Starovoitov, D. V. Leonenko, and L. N. Rabinskii 466

Flight Dynamics and Control of Flight Vehicles

Route Optimization of the Aircraft Flight

N. F. Averkiev, S. A. Vlasov, V. V. Salov, and V. V. Kiselev 474

Analysis of Dynamics of a Passive Line-of-Sight Stabilization System with Four-Axis
Gimbal Suspension

V. M. Borodin, I. O. Spiridonov, and R. N. Faizutdinov 480

Improvement of Handling Qualities for the Aircraft Longitudinal Motion

V. I. Garkushenko and S. S. Vinogradov 489

Composite Model of a Research Flight Simulator for a Helicopter with the Hingeless
Main Rotor

O. A. Ledyankina and S. A. Mikhailov 495

On a Certain Approach to Modeling Aerodynamics and Dynamics of Spatial Motion
of Single Rotor Helicopters

Yu. P. Onushkin, D. A. Sizov, V. A. Poluyakhtov, V. G. Pidodnya, and A. V. Ostrovoi 500

A Mathematical Model of Transforming the Vertical Takeoff and Landing Aircraft
with a Disk Wing at Maneuvering (on a Deck)

V. V. Pavlov 507

Modeling of Helicopter Flight Imitation in the Vortex Ring State

M. Yu. Toropov and S. Ya. Stepanov 517

Aero- and Gas-Dynamics of Flight Vehicles and Their Engines

Estimation of Mode Onset for Reverse Jet Reattachment to the Engine Nacelle in a Flow <i>V. L. Varsegov</i>	523
Parabolic Convective Motion of a Fluid Cooled from Below with the Heat Exchange at the Free Boundary <i>S. S. Vlasova and E. Yu. Prosviryakov</i>	529
A Combined Method for Calculating the Trajectories of Suspended Particles <i>T. Sh. Zaripov and A. K. Gil'fanov</i>	536
Model Study of Conditions, when the Reverse Jet Ingests into the Engine Input Located Behind the Wing <i>G. F. Mingaleev, S. G. Margulis, and A. V. Kosterin</i>	543

Aircraft and Rocket Engine Design and Development

Parametric Identification of a Mathematical Model of Heat Transfer in Carbon–Carbon (C–C) Materials for Aeronautical Application <i>O. M. Alifanov, S. A. Budnik, A. V. Nenarokomov, and D. M. Titov</i>	548
Influence of Exhaust Gas Recirculation on Technical, Economic, and Environmental Performance of High-Updated Diesel Aircraft Engine <i>V. M. Gureev, A. Kh. Khairullin, F. A. Varlamov, I. F. Gumerov, and R. Kh. Khafizov</i>	554
Improvement of Gas-Dynamic Efficiency of GTE Gas Turbine Stages at the Design Stage <i>A. E. Remizov, V. V. Vyatkov, and V. A. Lebedev</i>	559
A Combined Model of Calculating the Durability of Aircraft Engine High Speed Rolling Bearings <i>B. M. Silaev and P. A. Danilenko</i>	565
The Adjustment of Discharge and Spray in Fuel Injectors of Aircraft Engines <i>V. P. Smolentsev, S. V. Safonov, and I. I. Koptev</i>	571

Aircraft and Rocket Engine Theory

Thermal Radiation of Heterogeneous Combustion Products at the Nozzle Exit of the Rocket Microengine <i>V. A. Kuz'min, E. I. Maratkanova, I. A. Zagrai, and R. V. Rukavishnikova</i>	579
--	-----

Aircraft Instruments and Instrumentation Computer Complexes

Improving the Noise Stability of Measuring the Altitude and Speed Parameters Aboard a Helicopter <i>A. V. Nikitin, V. V. Soldatkin, and V. M. Soldatkin</i>	587
--	-----

Aircraft Production Technology

Study of the Kinematics Influence of Forming the Vane Channels of Axial Compressor Blisks by a Cup Mill on the Processing Accuracy <i>D. V. Kurylev</i>	595
A Technique of Finite Element Analysis for Co-curing a Composite Shell with Integral Metal Part <i>L. P. Shabalin, P. A. Khilov, and R. N. Sungatullin</i>	600

Automation of Design and Production of Aeronautical Equipment

Validation of Software for Computer-Aided Engineering of Composite Constructions
in Relation to Calculating the Natural Frequencies of Asymmetrical Laminated Plates

I. A. Buyanov, M. Yu. Rostovtsev, and V. V. Shelofast

606

Radio Engineering and Communications

Methodology to Ensure the Intrasystem Electromagnetic Compatibility of UAV
Avionics

R. R. Gainutdinov and S. F. Chermoshentsev

613

TECHNICAL NOTES

Aero- and Gas-Dynamics of Flight Vehicles and Their Engines

A Method of Design Calculation for the Two-Component Jet-Jet Gas Nozzle with Outer
Mixing

V. S. Egorychev and A. I. Ryazanov

619

Aircraft Production Technology

Methods for Measuring the Geometric Parameters of Products by the Laser Coordinate
Measuring System in Modern Mechanical Production

P. L. Lyudogovskii and M. A. Komkova

623
