

Contents

Vol. 63, No. 4, 2020

Aircraft Equipment

- Methods for Diagnosing the Technical Condition of Spacecraft Electric Pump Units and Predicting Their Remaining Useful Life
S. A. Matveev, N. A. Testoedov, D. V. Vasil'kov, O. V. Shirobokov, and M. I. Nadezhin 561
- Acoustic Characteristics of Aircraft Piston Engines
P. A. Moshkov 568
- Methodology for Estimating the Safety and Quality of the Aviation Service Provider Activities Using the Principal Component Analysis
V. D. Sharov, V. V. Vorob'ev, N. I. Nikolaikin, V. L. Kuznetsov, and S. A. Tolstykh 575
-

Flight Vehicle Design

- About the Landing Gear Design Experience for a Light Aircraft Based on Multidisciplinary Modeling
A. A. Mikhailov, I. A. Keresten', M. A. Nikitin, I. B. Voinov, and D. I. Morozov 586
-

Structural Mechanics and Strength of Flight Vehicles

- Averaged Mechanical Characteristics of M-Corrugation Shaped Folded Filler
V. N. Paimushin, S. A. Kholmogorov, G. G. Karimova, and M. A. Shishov 594
-

Flight Dynamics and Control of Flight Vehicles

- Adaptive Algorithm for Controlling the Soft Vertical Landing of an Unmanned Return Spacecraft. I
V. A. Afanas'ev, A. A. Baloev, G. L. Degtyarev, and A. S. Meshchanov 604
- Modeling of the Deployment Process Dynamics for Large-Sized Transformable Space Structures
V. N. Bakulin and S. V. Borzykh 610
- Strapdown Inertial Navigation System Transfer Alignment: Algorithmic Features and Simulation Performance Analysis
K. K. Veremeenko, M. V. Zharkov, I. M. Kuznetsov, and A. N. Pron'kin 618
- Method of Improving the Noise Resistance of Automatic Control Systems
V. I. Petunin and L. M. Neugodnikova 627
- Probabilistic Estimation of Aircraft Landing Accuracy
S. L. Semakov and M. V. Semakova 635
-

Aero- and Gas- Dynamics of Flight Vehicles and Their Engines

- To the Estimation of Force Coefficients and a Pitching Moment Acting on the Model, Full-Scale Aircraft and Their Elements at Supercritical Angles of Attack and in a Spin
M. A. Golovkin, A. A. Efremov, B. S. Kritskii, O. V. Pavlenko, and V. G. Tsipenko 643

Numerical Three-Dimensional Simulation of Gas Dynamic Processes in the Stage of a Small-Sized Ultra-Low Power Axial Turbine <i>D. S. Kalabukhov and V. M. Rad'ko</i>	652
Experimental Study of Aerodynamic Characteristics of a Boxplane Wind-Tunnel Model <i>E. A. Karpovich, N. I. Kochurova, and A. V. Kuznetsov</i>	659
Experimental and Numerical Investigation of the Mixing Ratio for Various Vane Swirlers of the Combustion Chamber of a Gas Turbine Engine <i>T. D. Nguen, Yu. B. Aleksandrov, A. I. Sulaiman, and B. G. Mingazov</i>	669
Pressure and Heat Flux Oscillations Induced by Gas-Dynamic Interaction between a High Inertia Particle and a Shock Layer <i>A. V. Sposobin, D. L. Reviznikov, I. E. Ivanov, and I. A. Kryukov</i>	677

Aircraft and Rocket Engine Design and Development

Development of Criteria for Estimating the Erosion Resistance of Aircraft Engine Parts from Composite Materials <i>A. N. Arkhipov, Yu. A. Ravikovich, D. P. Kholobtsev, and A. S. Shakhov</i>	686
Experimental Study of Destruction of a Foil Gas-Dynamic Bearing <i>M. P. Bulat, A. B. Nikitenko, and S. I. Sigachev</i>	692
Calculation of Basic Design Parameters and Structure of a Reactive Penetrator Intended for Movement in Lunar Soil <i>V. A. Zagovorchev, P. F. Pronina, and V. V. Rodchenko</i>	698

Aircraft and Rocket Engine Theory

The Distribution of Hydrodynamic Fields in Stationary Convection with Free Boundary <i>I. V. Anisimova, S. S. Vlasova, and Yu. F. Gortyshev</i>	706
Numerical Study of the Influence of Turbulent Diffusion Coefficients and Turbulent Prandtl Number on the Reactive Flow Simulation in a Combustor <i>V. P. Zhukov, I. N. Borovik, and E. A. Strokach</i>	713
Research of the Radial Jet Turbine Characteristics <i>Yu. P. Kuznetsov, V. L. Khimich, S. N. Khrunkov, A. B. Chuvakov, and R. A. Pogodin</i>	721

Aircraft Production Technology

Functional Metal-Polymer Composite Materials with Reversible Shape Memory Effect for Aeronautical and Space Structures <i>M. Yu. Kollerov, E. A. Lukina, D. E. Gusev, and R. E. Vinogradov</i>	730
Increasing the Accuracy of Honing for Thin-Walled Cylinders <i>V. A. Ogorodov and N. K. Krioni</i>	739
A Method for Calculating Residual Technological Strain and Deflection of a Single Curvature Composite Shell Reinforced by Stringers <i>I. N. Sidorov, A. M. Girfanov, V. L. Fedyayev, and L. P. Shabalin</i>	746

Radio Engineering and Communication

Secondary Wave Method for Polymer Composite Defect Diagnostics by the Radio Wave Method <i>G. V. Dmitrienko, D. V. Mukhin, G. L. Rivin, and A. A. Fedorov</i>	758
--	-----

TECHNICAL NOTES

Structural Mechanics and Strength of Flight Vehicles

Implementation of the Radiophotonic Method for Measuring Blade Deformations
of a Helicopter Main Rotor Model

M. A. Ledyankin, S. A. Mikhailov, D. V. Nedel'ko, and T. A. Agliullin

767

Flight Dynamics and Control of Flight Vehicles

Modeling the Motion of an Aircraft during Vertical Landing in Crosswind Conditions

M. F. Gasanov, I. I. Pasechnikov, A. V. Krayukhin, and A. I. Mel'nikova

771

Aero- and Gas- Dynamics of Flight Vehicles and Their Engines

Numerical Simulation of the Vertical Landing of Unmanned Aerial Vehicle
with Ducted Fan Propulsors by Eddy-Resolving Methods

D. V. Rybakov, P. S. Chernyshov, L. O. Vokin, and N. V. Prodan

776

Aircraft Production Technology

Improvement of Technologies for Longitudinal Bending and Straightening of Shaped
Aircraft Parts

V. A. Markovtsev, A. S. Baranov, A. G. Popov, and N. V. Levshonkov

781

Mathematical Model of Laser Cladding with Titanium Powder in Three-Dimensional
and Two-Dimensional Approximations

B. A. Khamidullin, I. V. Tsivil'skii, and A. Kh. Gil'mutdinov

784

Errata

Erratum to: A Technique and Results Obtained in Experimental Studies to Estimate
the Load Capacity of Radial Gas Foil Bearings

Yu. A. Ravikovich, Yu. I. Ermilov, and D. P. Kholobtsev

790
