

Contents

Vol. 64, No. 4, 2021

Aircraft Equipment

- Boeing 777 Fleet Statistical Contingency Fuel Determination on Fixed Routes
K. A. Kuts and G. V. Kovalenko 583
- Some Features of the Industrial Engineering and Labor Rating in Flexible Manufacturing Systems
I. G. Mardamshin, I. Sh. Sharafiev, and G.F. Mingaleev 591
- Interdisciplinary Analysis of Transient Processes in the Electric Pump Unit of the Liquid Thermal Control System of the Spacecraft
S. A. Matveev, N. A. Testoedov, A. V. Gorbunov, and A. S. Sablin 598
- Logistic Forecasting of Aircraft Nitrogen-Charging Service of Air Units in Peacetime and in Wartime
V. I. Ryazhskikh and V. A. Sumin 606
- Wireless Power Transmission System for Powering Onboard Equipment of an Aircraft
A. A. Ukhov, M. P. Bulat, I. A. Volobuev, S. V. Shapovalov, and R. V. Li 613

Flight Vehicle Design

- Simulation of Flows at Low Reynolds Numbers as Applied to the Design of Aerodynamic Surfaces for Unmanned Aerial Vehicles
S. Yu. Dudnikov, P. N. Kuznetsov, A. I. Mel'nikova, and L. O. Vokin 620

Structural Mechanics and Strength of Flight Vehicles

- Curved Composite Tubes: Stress-Strain Behavior Analysis and Design
L. P. Shabalin, V. I. Khaliulin, A. N. Shanygin, and V. V. Batrakov 630

Flight Dynamics and Control of Flight Vehicles

- Mathematical Model of a Single-Rotor Wheeled Helicopter Landing in Standard Conditions and Special Cases
M. M. Kruchinin and B. L. Artamonov 636
- Trajectory Tracking Controller for Bi-Rotor Coaxial Unmanned Aerial Vehicle Using Nonlinear Continuous-Time Generalized Predictive Control Combined to PI-Observer
Nkouagnou Calin Joel, Haman Djalo, and Kenfack Jiotso Aurelien 646

Aero- and Gas-Dynamics of Flight Vehicles and Their Engines

- Aeroacoustic Characteristics of a Quadcopter Impeller in Vertical Take-Off and Landing Mode
P. V. Denisenko, P. V. Bulat, P. S. Chernyshov, and K. N. Volkov 661
- Application of Mathematical Optimization Methods for Designing Airfoil Considering Viscosity
N. V. Prodan and A. A. Kurnukhin 670

Mathematical Modeling of Interferential Flow around the Finned Body in the Transport Compartment and When Exiting Thereof at Subsonic Aircraft Movement <i>P. V. Tokareva, V. T. Grumondz, and V. T. Kalugin</i>	688
--	-----

Aircraft and Rocket Engine Design and Development

Diagnostics of the Technical Condition of Aircraft Rolling Bearings Using the Holographic Interferometry <i>R. Kh. Makaeva, V. V. Takmovtsev, A. M. Tsareva, and N. I. Shakirov</i>	688
---	-----

Aircraft and Rocket Engine Theory

Realization of Dual-Mode Combustion by Changing the Geometry of the Model Combustion Chamber Flow Part of a Ramjet Engine <i>V. N. Avrashkov, A. B. Agul'nik, E. M. Gnesin, D. V. Meshcheryakov, and N. V. Mitrokhov</i>	695
3D Investigations of Heat Exchange and Hydrodynamics in Channels with Modified Double V-Shaped Dimples and Hemispherical Protrusions between Them <i>Yu. G. Gorelov</i>	702
Anomalous Features of Dynamics of Intrachamber Processes in a Low-Thrust Solid Propellant Rocket Engine with a Multi-Grain Propellant Charge <i>M. Yu. Egorov, D. M. Egorov, and S. M. Egorov</i>	711
Fretting Wear of Cryogenic Turbomachine Bearings for Superconductive Power Plants <i>Yu. I. Ermilov, Yu. A. Ravikovich, and D. P. Kholobtsev</i>	721
Spreading Features of SPT Jets in Vacuum Chamber <i>A. B. Nadiradze, I. P. Nazarenko, S. A. Khartov, and Yu. L. Frolova</i>	728
Determination of Combustion Characteristics in a Swirling Flow <i>T. D. Nguyen and B. G. Mingazov</i>	736
Validation of Local Resistance Coefficients Involved in Evaluation of Characteristics of Internal Ballistics in Solid Rocket Engines in One-Dimensional Approximation <i>A. N. Sabirzyanov Ch. B. Khamatnurova, and A. N. Kirillova</i>	742

Aircraft Instruments and Instrumentation Computer Complexes

Wave Solid-State Gyroscopes of Russian Design for Aircraft Onboard Systems <i>V. Ya. Raspopov, V. V. Likhosherst, and A. V. Kalikanov</i>	749
--	-----

Aircraft Production Technology

Regularities of the Heat Resistance Formation of Thermal Barrier Coatings Counting Technological Heredity <i>T. A. Il'inkova and A. T. Tagirov</i>	756
Alloys for Blades of Industrial and Marine Gas Turbine Plants: the Operation Peculiarities and Development Directions <i>A. V. Logunov, D. V. Danilov, M. N. Burov, and S. A. Zavodov</i>	764
Matching the Characteristics of Structural Strength and Structure to Justify the Stamping Technology of Titanium Alloys <i>F. I. Murataev and E. A. Shabalin</i>	773

Radio Engineering and Communication

Modeling of Thermal Processes in Transmitting Complexes of Radar Monitoring Stations

A. V. Timoshenko, A. Yu. Perlov, V. I. Goncharenko, and A. V. Ermakov

783

TECHNICAL NOTES

Flight Vehicle Design

Complex of Structural Components and a Method for Preliminary Determination of the Mass of the Helicopter Fuselage

I. I. Fedorov

792

Structural Mechanics and Strength of Flight Vehicles

Determination of Elastic Characteristics of the Helicopter Blade Attachment Based on the Strength Tests Results

V. A. Kostin and A. M. Garaev

800

Flight Dynamics and Control of Flight Vehicles

Analysis of Emergency Situations Arising from the Interaction of Air and Ground Vehicles

A. V. Shvetsov

805
