High-voltage frequency converters for controllable power-industry drives. G. B. Lazarev	3	1
Multilevel frequency converter for moderate-voltage drives. A. A. Shavelkin	9	6
Development of the military power industry up to 2015. M. I. Kritenko, V. M. Isaev, and Yu. I. Stepanov	16	13
Special-purpose semiconductor power modules. E. V. Istomin, M. I. Kritenko, S. N. Florentsev, and E. N. Yakovlev	24	19
Matlab-Simulink simulation of an autonomous inverter based on a transformer with a rotating magnetic field. A. I. Cherevko and D. A. Gavrilov	31	27
Micro-Cap 7 simulation of an autonomous inverter based on a transformer with a rotating magnetic field. A. I. Cherevko, A. I. Kazakevich, and D. N. Semenov	40	37
Improving drive dynamics with phase synchronization. A. V. Bubnov	48	48
Systematic approach to estimating the losses in synchronous microdrives. V. F. Glazunov, V. V. Pikunov, and A. S. Mitrofanov	52	52
Dynamics of thyristor drives at low speed. A. G. Ivanov and A. G. Sergeev	56	57
Dynamic processes in a drive with a synchronous motor under vector control. B. I. Reshmin	59	61
