RUSSIAN ELECTRICAL ENGINEERING

PAGES
RUSSIAN/ENGLISH

Similarity condition for the basic fields of magnetically coupled loops. V. V. Sotnikov	3	1
Circuit models of rectifiers with rotating-field transformers in Micro-Cap 7 software. A. I. Cherevko, D. N. Semenov, and A. I. Kazakevich	8	7
Secondary losses due to circulating currents in low-voltage windings of distributional transformers. A. S. Arkhipov	16	16
Harmonic composition of a transformer's idling current. O. N. Ivanchenko, P. G. Kokhan, V. V. Koval, G. O. Semchuk, and V. A. Endik	22	24
Winding power in transformer converters that adjust the number of phases for multipulse rectifiers. S. V. Myatezh, G. N. Vorfolomeev, S. A. Evdokimov, and N. I. Shchurov	28	32
Equivalent bridge circuit of the magnetic system of an electrical reactor with longitudinal-transverse biasing. L. L. Fedosov	37	42
Design strategy for switched-reluctance starter-generators. V. A. Kuznetsov and V. V. Nikolaev	46	56
Determining the active impedance of a short-circuited box winding. V. A. Razmyslov and T. V. Gerasimenko	51	62
Simple calculation of wire cross section at low and high frequencies. V. A. Morozov and G. M. Mikheev	54	67
