RUSSIAN ELECTRICAL ENGINEERING

PAGES
RUSSIAN/ENGLISH

Controllable synchronous motor in a system with frequency and phase feedback. G. A. Vainer and B. G. Stroganov.....	3	1
Increasing the reliability of low-voltage micromachines with normalized starting voltage. M. A. Vil'kin, Yu. I. Semenov, and Yu. N. Nikiforov	10	10
Control of a four-mass electromechanical system by means of a speed-stabilizing two-mass electromechanical system. B. Sh. Burgin.....	15	16
SKALA-MIKRO information and measurement system. S. D. Dzhumaev	18	21
Electroerosive production of coating material in a coaxial magnetic-plasma accelerator. A. A. Sivkov, D. Yu. Gerasimov, and A. S. Tsybina	25	27
Transformer-type electric radiators. V. A. Razmyslov, A. V. Serikov, and T. V. Gerasimenko.....	34	36
Thermal processes in sealed lead batteries. V. V. Bayunov, Yu. A. Podalinskii, and G. V. Krivchenko.....	37	39
Measurements of converging electron beams by means of a rotating Faraday cylinder. V. P. Narkhinov and B. B. Tsyrenzhapov.....	40	42
Division of a superconducting current limiter into sections. S. I. Kopylov	44	48
Limiting detection depth of local ferromagnetic objects in a semiconducting medium. G. N. Shcherbakov, M. A. Antselevich, and D. N. Udintsev	48	53
Distributed electromagnetic model of an electron and its discrete states (a classical wave approach). V. M. Yurkevich	53	59
