RUSSIAN ELECTRICAL ENGINEERING

	PAGES	
	RUSSIAN/ENGLISH	
Thirteenth International Conference on ac Drives. I. Ya. Braslavskii	3	1
Semiclosed-loop control of ac drives. A. M. Veinger	4	2
Direct torque control system of asynchronous drive. A. E. Kozyaruk and V. V. Rudakov	8	7
Determining the energy consumption of various asynchronous drives. I. Ya. Braslavskii and Yu. V. Plotnikov	14	14
Optimizing steady motor operation. V. N. Polyakov and R. T. Shreiner	18	20
Frequency converter for asynchronous general-purpose drive. A. G. Garganeev, A. S. Karakulov, S. V. Langraf, and M. A. Nechaev	23	25
Synthesis of stable digital drive control systems. Z. Sh. Ishmatov	27	30
Stability loss of steady processes in an asynchronous drive with vector control. Yu. V. Kolokolov and S. L. Loschinskii	33	38
Sensorless drive systems based on a thyristor voltage converter and an asynchronous motor. A. M. Zyuzev and K. E. Nesterov	38	44
Rectifier with pulsewidth modulation. V. M. Berestov and S. A. Kharitonov	42	49
Relay control of active frequency converters. R. T. Shreiner, A. A. Efimov, and I. A. Mukhamatshin	47	57
Synthesis of asynchronous-drive control systems using neural networks. I. Ya. Braslavskii, A. V. Kostylev, D. V. Mezeusheva, and D. P. Stepanyuk	54	65
Operation of a linear magnetohydrodynamic induction pump. F. N. Sarapulov, S. F. Sarapulov, and B. A. Sokunov	58	69
Digital regulators for external drive control loops. Z. Sh. Ishmatov, M. A. Volkov, and Yu. V. Plotnikov	62	74
