## RUSSIAN MATHEMATICS (Iz. VUZ)

	<div style="display: inline-block; text-align: right;"> <b>Pages</b>  <b>Russian/English</b> </div>
<i>Three-parameter inverse boundary value problems in simply connected domains.</i> N.R. Abubakirov .....	3      1
<i>Continuity of the reduced modulus and the transfinite diameter.</i> V.V. Aseev and O.A. Lazareva .....	10      8
<i>On the nonwandering set and the center of skew products of maps of the interval.</i> L.S. Efremova .....	19      17
<i>Extensions of point-invariant classes of ordinary differential equations of the third order.</i> V.V. Kartak .....	29      26
<i>Penalty method for grids matching in the finite element method.</i> L.V. Maslovskaya and O.M. Maslovskaya .....	33      29
<i>Motion of a viscoelastic medium with a free boundary.</i> V.P. Orlov .....	44      40
<i>Approximate analytic solutions of the problem on plane forms of free oscillations for a rectangular plate with unfixed edges.</i> V.N. Paimushin .....	51      47
<i>Generators and defining relations of the generalized full linear group over semilocal rings without unity. I.</i> Zh.S. Satarov .....	59      55
<i>Fundamental operator-functions of singular differential operators with sectoriality and radiality properties.</i> M.V. Falaleev .....	68      64
<i>A mixed problem with deviation from a characteristic for the Lavrent'ev–Bitsadze equation with a complex parameter.</i> N.V. Shustrova .....	76      72
