## RUSSIAN MATHEMATICS (Iz. VUZ)

	<b>Pages</b> <b>Russian/English</b>
<i>Quasi-stability measure of the <math>l_1</math>-metric for a vector combinatorial problem with a parametric optimality principle.</i> V.A. Emelichev and K.G. Kuz'min.....	3      1
<i>Complexity of the allocation problem on a line with constraints on minimal distances.</i> G.G. Zabudskii .....	11      9
<i>Representation of a sheaf of admissible trajectories in a linear control problem with an impulse constraint.</i> T.Yu. Kashirtseva and A.G. Chentsov .....	15      13
<i>Convergence of the conditional gradient method.</i> V.S. Klimov.....	27      25
<i>An approximate dual type method for systems of variational inequalities.</i> I.V. Konnov ...	35      33
<i>The coefficient control problem and the extended derivative over a convex set.</i> S.Ya. Serovaiskii .....	46      43
<i>The efficient choice of discrete data for solution of ill-posed problems.</i> S.G. Solodky .....	56      52
<i>A bilinearization solution method for problems of program control optimization.</i> V.A. Srochko and S.N. Ushakova .....	63      59
<i>A modification of the Rosen method for an inverse-convex problem.</i> A.S. Strekalovskii and T.T. Yakovleva.....	70      65
<i>Convergence of the gradient projection method for a certain class of nonconvex problems in mathematical programming.</i> Yu.A. Chernyaev .....	76      71
