## RUSSIAN MATHEMATICS (Iz. VUZ)

The issue is dedicated to the study within the theory of differential and functional differential equations. The boundary value problems, the control problems, the questions of stability and asymptotic properties of solutions are considered. See the previous issues on this theme: no. 5, 1993; no. 6, 1994; no. 10, 1995; no. 11, 1996; no. 6, 1997; no. 2, 1999; no. 6, 2001; no. 6, 2002; no. 4, 2003; no. 6, 2004.

	<b>Pages</b> <b>Russian/English</b>
<i>Existence and uniqueness of a positive solution of the boundary value problem for certain nonlinear functional-differential equation of the second order. G.E. Abduragimov</i> . . . . .	3      1
<i>Uniform asymptotic of a solution of a nonhomogeneous system of two differential equations with a turning point. V.N. Bobochko</i> . . . . .	8      6
<i>The behavior of solutions of systems of neutral functional-differential equations. V.V. Vlasov</i> . . . . .	19      17
<i>Asymptotic properties of certain systems with two delays. B.G. Grebenshchikov</i> . . . . .	27      24
<i>The Cauchy function of a functional-differential equation in a Banach space. Ye.S. Zhukovskii</i> . . . . .	38      34
<i>Proof of basis property using only asymptotics of eigenelements and adjoined elements. V.S. Mokeichev</i> . . . . .	48      43
<i>On compactification of a bundle of trajectories of one abstract controllable system. A.G. Chentsov</i> . . . . .	55      50
<i>On piecewise injective measurable maps. A.V. Chistyakov</i> . . . . .	67      62
<i>On the duality of partial and conditional stabilities of linear functional-differential equations. K.M. Chudinov</i> . . . . .	73      67
