RUSSIAN MATHEMATICS (Iz. VUZ)

	Pages Russian/English
<i>Analytic solution method for a mixed problem for a quasilinear parabolic system.</i> A.I. Vagabov and Z.A. Abdurakhmanov	3 1
<i>Conformal transformations of surfaces in Minkowski space which preserve the Grassmann image.</i> V.A. Gor'kavy	13 11
<i>On the stability of the solution of the problem on the best approximation of a convex compact by a ball.</i> A.S. Dudova	25 22
<i>Estimation of the rate of convergence of the Fourier–Legendre series of functions of bounded variation.</i> D.V. Kurdomonov	34 31
<i>On unbounded solutions of the stationary Schrödinger equation on model Riemannian manifolds.</i> A.G. Losev, Ye.A. Mazepa, and V.Yu. Chebanenko	46 43
<i>On the bound of existence of uniqueness for two-dimensional Haar series.</i> M.G. Plotnikov	57 54
<i>The Tricomi problem for an equation of mixed type with a nonsmooth line of power degeneracy.</i> K.B. Sabitov and N.V. Chiganova	65 62
<i>Asymptote of the resolvent of the Volterra equation with a difference kernel with power singularities of a symbol.</i> Z.B. Tsalyuk	77 74
