Vol. 2017, No. 3

A simultaneous English language translation of this journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *Russian Metallurgy (Metally)* ISSN 0036-0295.

Structure and Thermal Properties of the Matte of the Autogenous Smelting of Copper–Zinc Concentrates

E. N. Selivanov, R. I. Gulyaeva, N. I. Sel'menskikh, and V. V. Belyaev 163

Hydrometallurgical Methods of Recovery of Scandium from the Wastes of Various Technologies

T. V. Molchanova, I. D. Akimova, K. M. Smirnov, O. K. Krylova, and E. V. Zharova 170

Measurement of the Electrical Resistivity of Liquid 32G2 and 32G1 Steels by the Rotating Magnetic Field Method

M. A. Borovykh, O. A. Chikova, V. S. Tsepelev, and V. V. Vyukhin 175

Experimental Investigation of the Acoustic Properties and the Microhardness of U8 Steel

V. V. Roshchupkin, M. M. Lyakhovitskii, M. A. Pokrasin, and N. A. Minina 179

Effect of Modification on the Solidification of Al–Si Aluminum Alloys

I. A. Petrov, D. V. Berezhnoi, A. P. Ryakhovskii, and V. S. Moiseev 184

Technique of Determining the Parameters of Rapid Strengthening of an Aluminum Alloy during Hot Rolling

Yu. N. Loginov and M. A. Golovnin 188

Effect of Dysprosium on the Kinetics and Structural Transformations during the Decomposition of the Supersaturated Solid Solution in Magnesium–Samarium Alloys

L. L. Rokhlin, E. A. Luk'yanova, N. Yu. Tabachkova, T. V. Dobatkina, I. E. Tarytina, and I. G. Korol'kova 193

Solid-State Oxidation Kinetics of an Yttrium-Containing AK1M2 Alloy

A. E. Berdiev, I. N. Ganiev, and Kh. Kh. Niezov 200

Interaction of Niobium and Tungsten Monocarbides in Molten Copper

L. E. Bodrova, O. M. Fedorova, A. B. Shubin, and E. A. Pastukhov 204

Thermodynamic Description of the Interaction Processes in the Cu–Ce–O System in the Temperature Range 1100–1300°C

O. V. Samoilova, G. G. Mikhailov, L. A. Makrovets, and E. A. Trofimov 209

FCC → FCT Martensitic Transformation in Two-Phase Mn–Cu Alloys

G. I. Nosova 216

Effect of the Temperature–Rate Parameters of Directional Solidification on the Structure Formation in High-Temperature Materials

I. L. Svetlov and A. V. Neiman 221

Producing of Ultrafine Grained Composites with a Large Uniform Elongation by Twist Extrusion: Mathematical Simulation

O. V. Prokof'eva, Y. Y. Beygelzimer, R. Y. Kulagin, Y. Z. Estrin, and V. N. Varyukhin 226
