CONTENTS

VOLUME 46 NUMBER 8 2005

RUSSIAN JOURNAL OF NON-FERROUS METALS

	PAGES RUSSIAN	PAGES ENGLISH
Metallurgy of Non-Ferrous Metals		
A systematic scientific approach to problems associated with the use of arsenic and sulfur in industry. K. Zh. Zhumashev	9	1
Metallurgy of Less-Common and Precious Metals		
Sorption of zirconium out of sulfate-fluoride solutions by means of aminocarboxylic polyampholites. V. N. Rychkov and A. P. Tsevin	18	5
Electrical conductivity of alkali solutions of sodium tungstate and sodium molybdate. V. M. Alkatseva	28	12
Metal Forming		
A model of porous material that takes into account the geometry of the pores. A. P. Polyakov	35	18
Physical Metallurgy and Heat Treatment		
Analysis of five-component state diagrams in region of composition of piston silumins. N. A. Belov and N. N. Avksent'eva	47	26
Powder Materials and Coatings		
The structure factor in processes of creating powders of intermetallic compounds. V. V. Zhigunov and A. V. Kasimtsev	63	37
Structural Macrokinetics. SHS		
Mathematical modeling of high-temperature synthesis of nickel aluminides under pressure. O. V. Lapshin, V. E. Ovcharenko, and I. S. Ramazanov	67	42
