

# SIBERIAN MATHEMATICAL JOURNAL

Volume 62, Number 2

March–April, 2021

## CONTENTS

Engl./Russ.

|                                                                                                                                                                          |     |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----|
| <b>S. V. Astashkin</b> , <i>Sequences of Independent Functions in Rearrangement Invariant Spaces</i> .....                                                               | 189 | 239 |
| <b>O. V. Borodin and A. O. Ivanova</b> , <i>Heights of Minor Faces in 3-Polytopes</i> .....                                                                              | 199 | 250 |
| <b>D. K. Durdiev and Zh. D. Totieva</b> , <i>About Global Solvability of a Multidimensional Inverse Problem for an Equation with Memory</i> .....                        | 215 | 269 |
| <b>S. F. Kamornikov, V. N. Tyutyanov, and O. L. Shemetkova</b> , <i>On <math>\sigma</math>-Subnormality of Sylow Subgroups in a Finite Group</i> .....                   | 230 | 286 |
| <b>M. B. Karmanova</b> , <i>The Coarea Formula for Vector Functions on Carnot Groups with Sub-Lorentzian Structure</i> .....                                             | 239 | 298 |
| <b>V. A. Koibaev</b> , <i>Closed Elementary Nets over a Field of Characteristic 0</i> .....                                                                              | 262 | 326 |
| <b>V. B. Korotkov</b> , <i>On Almost Compactness of Some Partially Integral Operators in <math>L_p</math></i> .....                                                      | 267 | 333 |
| <b>S. A. Nazarov and L. Chesnel</b> , <i>Almost Complete Transmission of Waves Through Perforated Cross-Walls in a Waveguide with Dirichlet Boundary Condition</i> ..... | 272 | 339 |
| <b>P. G. Potseiko and E. A. Rovba</b> , <i>Approximations on Classes of Poisson Integrals by Fourier–Chebyshev Rational Integral Operators</i> .....                     | 292 | 362 |
| <b>D. O. Revin</b> , <i>Submaximal Soluble Subgroups of Odd Index in Alternating Groups</i> ....                                                                         | 313 | 387 |
| <b>M. A. Skvortsova and T. Yskak</b> , <i>Asymptotic Behavior of Solutions in One Predator–Prey Model with Delay</i> .....                                               | 324 | 402 |
| <b>V. N. Starovoitov</b> , <i>Unique Solvability of a Linear Parabolic Problem with Nonlocal Time Data</i> .....                                                         | 337 | 417 |
| <b>A. M. Staroletov</b> , <i>Composition Factors of the Finite Groups Isospectral to Simple Classical Groups</i> .....                                                   | 341 | 422 |
| <b>A. A. Stepanova and A. I. Krasitskaya</b> , <i>P-Stability of Some Classes of S-Acts</i> ...                                                                          | 357 | 441 |
| <b>F. Sun, X. Yi, and S. F. Kamornikov</b> , <i>Finite Groups with Generalized Subnormal Schmidt Subgroups</i> .....                                                     | 364 | 450 |
| <b>N. A. Tyurin</b> , <i>Examples of Mironov Cycles in Grassmannians</i> .....                                                                                           | 370 | 457 |
| <b>N. Yang and A. A. Galt</b> , <i>On the Local Case in the Aschbacher Theorem for Symplectic and Orthogonal Groups</i> .....                                            | 377 | 466 |
