

SIBERIAN MATHEMATICAL JOURNAL

Volume 62, Number 5

September–October, 2021

CONTENTS

Engl./Russ.

M. Amini and F. Behrouzi, <i>The Furstenberg Boundary of Groupoids</i>	773	953
V. V. Aseev, <i>On the Geometric Definition of Quasiconformality</i>	782	965
N. A. Bazhenov and M. I. Marchuk, <i>On Categoricity Spectra for Locally Finite Graphs</i>	796	983
G. V. Demidenko, <i>On One Class of Systems of Differential Equations with Periodic Coefficients in Linear Terms</i>	805	995
R. A. Kornev, <i>A Semilattice of Degrees of Computable Metrics</i>	822	1013
A. V. Kostochka, G. McCourt, and M. Nahvi, <i>On Sizes of 1-Cross Intersecting Set Pair Systems</i>	842	1039
A. V. Kravchenko, A. M. Nurakunov, and M. V. Schwidefsky, <i>Structure of Quasivariety Lattices. IV. Nonstandard Quasivarieties</i>	850	1049
B. Li, Q. Chen, and C. Qiaolin, <i>On Some Criteria of f-Hypercentral Actions of Finite Groups</i>	859	1061
L. El Fadil, M. Boulagouaz, and A. Deajim, <i>A Dedekind Criterion over Valued Fields</i>	868	1073
L. L. Maksimova and V. F. Yun, <i>Hybrid Extensions of the Minimal Logic</i>	876	1084
A. G. Melnikov, <i>New Degree Spectra of Polish Spaces</i>	882	1091
D. A. Prokudin, <i>Existence of Weak Solutions to the Problem on Three-Dimensional Steady Heat-Conductive Motions of Compressible Viscous Multicomponent Mixtures</i>	895	1109
V. G. Romanov, <i>On Justification of the Gelfand–Levitan–Krein Method for a Two-Dimensional Inverse Problem</i>	908	1124
V. E. Fedorov and M. M. Turov, <i>The Defect of a Cauchy Type Problem for Linear Equations with Several Riemann–Liouville Derivatives</i>	925	1143
E. A. Fominykh and E. V. Shumakova, <i>Poor Ideal Three-Edge Triangulations Are Minimal</i>	943	1163
M. J. Shi, S. K. Wang, X. X. Li, and D. S. Krotov, <i>On the Number of Frequency Hypercubes $F^n(4; 2, 2)$</i>	951	1173
